INSTITUTE

VISION MISSION

# INSTITUTE VISION AND MISSION

## VISION

To be a premier technological institute striving for excellence with global perspective and commitment to the nation.

## MISSION

- To produce engineering graduates of professional quality and global perspective through Learner Centric Education.
- To establish linkages with government, industry and research laboratories to promote R&D activities and to disseminate innovations.
- To create an eco-system in the institute that leads to holistic development and ability for life-long learning.

DEPARTMENT

VISION

MISSION

# DEPARTMENT

## VISION AND MISSION

### **Vision:**

- To evolve as a centre of academic and research excellence in the area of Computer Science and Engineering.

### **Mission:**

- To utilize innovative learning methods for academic improvement.
- To encourage higher studies and research to meet the futuristic requirements of Computer Science and Engineering.
- To inculcate Ethics and Human values for developing students with good character

**PROGRAMME  
EDUCATIONAL  
OBJECTIVES,  
PROGRAMME  
OUTCOMES &  
PROGRAMME  
SPECIFIC  
OUTCOMES**

**Program Educational Objectives (PEOs):** Graduates of this programme will

**PEO 1:** Adapt to evolving technology.

**PEO 2:** Provide optimal solutions to real time problems.

**PEO 3:** Demonstrate his/her abilities to support service activities with due consideration for Professional and Ethical Values.

**Programme Specific Outcomes (PSO s):** A graduate of the Computer Science and Engineering Program will be able to:

**PSO 1:** Use Mathematical Abstractions and Algorithmic Design along with Open Source Programming tools to solve complexities involved in Programming. [K3]

**PSO 2:** Use Professional engineering practices and strategies for development and maintenance of software. [K3]

**Program Outcomes (POs): Computer Science Engineering Graduates will be able to:**

1. **Engineering knowledge:** Apply the knowledge of Mathematics, Science, Engineering Fundamentals and Concepts of Computer Science Engineering to the solution of complex Engineering problems. **[K3]**
2. **Problem analysis:** Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of Mathematics, Natural Sciences and Computer Science. **[K4]**
3. **Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specific needs with appropriate consideration for the public health and safety, and the cultural, societal and environmental considerations. **[K5]**
4. **Conduct investigations of complex problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions. **[K5]**
5. **Modern tool usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex Engineering activities with an understanding of the limitations. **[K3]**
6. **The Engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional Engineering practice. **[K3]**
7. **Environment and sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development. **[K3]**
8. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the Engineering practice. **[K3]**
9. **Individual and team work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings. **[K6]**
10. **Communication:** Communicate effectively on complex Engineering activities with the Engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions. **[K2]**
11. **Project management and finance:** Demonstrate knowledge and understanding of the Engineering and Management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments. **[K6]**
12. **Life-long learning:** Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change. **[K1]**

# LESSON PLANS

# Discrete Mathematics and Graph Theory

Academic Year: 2024-25

Year/ Semester: III

Name of the Course: Discrete Mathematics and Graph Theory

Course Code: V23MAT06

Programme: B.Tech

Section: A,B,C& D

## LESSON PLAN

**Course Outcomes** (Along with Knowledge Level): After completion of this course, Student will be able to:

| S. No. | CO. No. | Course Outcome                                                                                                | BTL |
|--------|---------|---------------------------------------------------------------------------------------------------------------|-----|
| 1.     | CO1     | Develop skills required for solving mathematical problems using mathematical logic.                           | K3  |
| 2.     | CO2     | Demonstrate the set theory principles, relations and functions in real-time situations.                       | K3  |
| 3.     | CO3     | Apply the knowledge of combinatorics and recurrence relations in formulating and solving complex problems.    | K3  |
| 4.     | CO4     | Apply the graph theory principles and techniques in computer science-related problems.                        | K3  |
| 5.     | CO5     | Find shortest paths and minimal spanning trees using prim's and Kruskal's algorithms, BFS and DFS algorithms. | K3  |

### **Text Books:**

1. Discrete Mathematical Structures with Applications to Computer Science, J.P. Tremblay and P. Manohar, Tata McGraw Hill.
2. Elements of Discrete Mathematics-A Computer Oriented Approach, C.L.Liu and D. P. Mohapatra, 3rd Edition, Tata McGraw Hill.
3. Theory and Problems of Discrete Mathematics, Schaum's Outline Series, Seymour Lipschutz and Marc Lars Lipson, 3rd Edition, McGraw Hill.

### **Reference Books:**

1. Discrete Mathematics for Computer Scientists and Mathematicians, J.L.Mott, A.Kandel and T. P. Baker, 2nd Edition, Prentice Hall of India.
2. Discrete Mathematical Structures, Bern and Kolman, Robert C. Busby and Sharon Cutler Ross, PHI.
3. Discrete Mathematics, S.K. Chakraborty and B.K.Sarkar, Oxford, 2011.
4. Discrete Mathematics and its Applications with Combinatorics and Graph Theory, K.H.Rosen, 7th Edition, Tata McGraw Hill.

### **Targeted Proficiency and attainment Levels (for each Course Outcome):**

| Cos                          |         | CO1 | CO2 | CO3 | CO4 | CO5 |
|------------------------------|---------|-----|-----|-----|-----|-----|
| Targeted Proficiency Level   |         | 60  | 60  | 60  | 60  | 60  |
| Targeted level of Attainment | Level 3 | 60  | 60  | 60  | 60  | 60  |
|                              | Level 2 | 50  | 50  | 50  | 50  | 50  |
|                              | Level 1 | 40  | 40  | 40  | 40  | 40  |

**Lecture Plan:**

| S. No | Course Outcome | Intended Learning Outcomes (ILO)                                                       | Knowledge Level of ILO | No. of Hours Required | Pedagogy                | Teaching aids |
|-------|----------------|----------------------------------------------------------------------------------------|------------------------|-----------------------|-------------------------|---------------|
| 1     | CO1            | Dissemination of Vision, Mission, PEOs, POs,PSOs                                       |                        | 1                     | Lecture                 | IFP           |

# Managerial Economics and Financial Analysis

Academic Year: 2024-25

Programme: B.Tech

Year/ Semester: III

Section: A,B,C& D

Name of the Course: Managerial Economics and Financial Analysis

Course Code: V23MBT51

## LESSON PLAN

**Course Outcomes** (Along with Knowledge Level): After completion of this course, Student will be able to:

| S. No | CO. No | Course Outcomes                                                                                                          | BTL |
|-------|--------|--------------------------------------------------------------------------------------------------------------------------|-----|
| 1     | CO1    | Understanding the basic concepts of managerial economics, demand, elasticity of demand and methods of demand forecasting | K2  |
| 2     | CO2    | Interpret production concept, least cost combinations and various costs concepts in decision making.                     | K3  |
| 3     | CO3    | Differentiate various Markets and Pricing methods along with Business Cycles.                                            | K2  |
| 4     | CO4    | Prepare financial statements and its analysis.                                                                           | K3  |
| 5     | CO5    | Assess various investment project proposals with the help of Capital Budgeting techniques for decision making            | K3  |

### **Text Books:**

1. Dr. N. Appa Rao, Dr. P. Vijay Kumar: 'Managerial Economics and Financial Analysis', Cengage Publications, New Delhi – 20112.
2. Dr. A. R. Aryasri – Managerial Economics and Financial Analysis, TMH 2011.

### **Reference Books:**

- 1 Dr. B. Kuberudu and Dr. T. V. Ramana: Managerial Economics & Financial Analysis, Himalaya Publishing House, 2014
2. S. A. Siddiqui; A. S. Siddiqui: Managerial Economics and Financial Analysis, New Age International Publishers, 2012.

Targeted Proficiency and attainment Levels (for each Course Outcome):

| COs                          |         | CO1 | CO2 | CO3 | CO4 | CO5 |
|------------------------------|---------|-----|-----|-----|-----|-----|
| Targeted Proficiency Level   |         | 60  | 60  | 60  | 60  | 60  |
| Targeted level of Attainment | Level 3 | 60  | 60  | 60  | 60  | 60  |
|                              | Level 2 | 50  | 50  | 50  | 50  | 50  |
|                              | Level 1 | 40  | 40  | 40  | 40  | 40  |

**Lecture Plan:**

|------|----------------|----------------------------------------------------------------------|-------------------------|-----------------------|-----------------|---------------|
| 1    | CO1            | Define managerial economics                                          | K1                      | 1                     | Lecture Discuss | IFP           |
| 2    |                | Describe ME with other disciplines                                   | K1                      | 1                     | Lecture         | IFP           |
| 3    |                | Explain Nature and scope of managerial economics                     | K2                      | 1                     | Lecture         | IFP           |
| 4    |                | Define Demand                                                        | K1                      | 1                     | Lecture Discuss | IFP           |
| 5    |                | Describe law of demand                                               | K2                      | 1                     | Lecture         | IFP           |
| 6    |                | Explain Elasticity of demand                                         | K2                      | 2                     | Lecture         | IFP           |
| 7    |                | Find the of elasticity of demand                                     | K2                      | 2                     | Lecture         | IFP           |
| 8    |                | Explain Demand forecasting, methods.                                 | K2                      | 2                     | Lecture Discuss | IFP           |
|      |                | Total                                                                |                         | 11                    |                 |               |
| S.No | Course Outcome | Intended Learning Outcomes (ILO)                                     | Know ledge Level of ILO | No. of Hours Required | Pedagog y       | Teaching aids |
| 1    | CO2            | State Production function                                            | K1                      | 1                     | Lecture         | IFP           |
| 2    |                | State Isocost                                                        | K1                      | 1                     | Lecture         | IFP           |
| 3    |                | State Iso quants                                                     | K1                      | 1                     | Lecture         | IFP           |
| 4    |                | Explain Cob-Douglas production function                              | K2                      | 1                     | Lecture Discuss | IFP           |
| 5    |                | Describe economies of scale                                          | K2                      | 1                     | Lecture         | IFP           |
|      |                | Enumerate various cost concepts                                      | K1                      | 1                     | Lecture         | IFP           |
|      |                | Solve break even analysis problems                                   | K3                      | 4                     | Lecture         | IFP           |
|      |                | Total                                                                |                         | 10                    |                 |               |
| 1    | CO3            | Describe Different types of market structures                        | K1                      | 3                     | Lecture         | IFP           |
| 2    |                | Explain Price-output determination under different market structures | K2                      | 4                     | Lecture         | IFP           |
| 3    |                | Explain Pricing objectives, Cost and demand based Pricing methods    | K2                      | 2                     | Lecture         | IFP           |

|   |            |                                                          |    |           |         |     |
|---|------------|----------------------------------------------------------|----|-----------|---------|-----|
| 4 |            | Describe competition, strategy based pricing methods.    | K2 | 2         | Lecture | IFP |
| 5 |            | State the meaning and features of business cycles        | K1 | 1         | Lecture | IFP |
| 6 |            | Describe the Phases of business Cycles.                  | K2 | 2         | Lecture | IFP |
|   |            | <b>Total</b>                                             |    | <b>14</b> |         |     |
| 1 | <b>CO4</b> | Describe double entry system                             | K2 | 3         | Lecture | IFP |
| 2 |            | Preparation of financial statements                      | K3 | 4         | Lecture | IFP |
| 3 |            | Interpretation of financial statements by using, Ratios. | K3 | 6         | Lecture | IFP |
|   |            | <b>Total</b>                                             |    | <b>13</b> |         |     |
| 1 | <b>CO5</b> | Define Capital                                           | K1 | 1         | Lecture | IFP |
| 2 |            | Explain significance of capital budgeting                | K1 | 1         | Lecture | IFP |
| 3 |            | Explain capital budgeting, Process                       | K2 | 4         | Lecture | IFP |
| 5 |            | Apply capital budgeting techniques                       | K3 | 4         | Lecture | IFP |
|   |            | <b>Total</b>                                             |    | <b>10</b> |         |     |

**Total No. of Classes: 58**

# DIGITAL LOGIC & COMPUTER ORGANIZATION

**Academic Year: 2024-25**

**Programme: B.Tech**

**Year/ Semester: III**

**Section: A,B,C& D**

**Name of the Course: DIGITAL LOGIC & COMPUTER ORGANIZATION**

**Course Code: V23CST03**

## LESSON PLAN

**COURSE OUTCOMES (Along with Knowledge Level):** After completion of this course, the students will be able to:

| S. No. | CO No. | Course Outcome                                                                          | BTL |
|--------|--------|-----------------------------------------------------------------------------------------|-----|
| 1.     | CO1    | Explain different Data Representation and various Combinational Digital Logic Circuits. | K2  |
| 2.     | CO2    | Explain various Sequential Digital Logic Circuits and Basic Structure of Computers.     | K2  |
| 3.     | CO3    | Describe the Computer Arithmetic and basic concepts of Processor Organization           | K2  |
| 4.     | CO4    | Illustrate different types of Memory.                                                   | K2  |
| 5.     | CO5    | Demonstrate the ways of accessing various Interfacing devices with processor.           | K3  |

### **Text Books:**

1. Computer Organization, Carl Hamacher, Zvonko Vranesic, Safwat Zaky, 6th edition,
2. Digital Design, 6th Edition, M. Morris Mano, Pearson Education.
3. Computer Organization and Architecture, William Stallings, 11th Edition, Pearson.

### **Reference Books:**

1. Computer Systems Architecture, M. Moris Mano, 3rd Edition, Pearson.
2. Computer Organization and Design, David A. Paterson, John L. Hennessy, Elsevier
3. Fundamentals of Logic Design, Roth, 5th Edition, Thomson.

### **Targeted Proficiency and attainment Levels (for each Course Outcome):**

| Cos                                 |                | CO1 | CO2 | CO3 | CO4 | CO5 |
|-------------------------------------|----------------|-----|-----|-----|-----|-----|
| <b>Targeted Proficiency Level</b>   |                | 60  | 60  | 60  | 60  | 60  |
| <b>Targeted level of Attainment</b> | <b>Level 3</b> | 60  | 60  | 60  | 60  | 60  |
|                                     | <b>Level 2</b> | 50  | 50  | 50  | 50  | 50  |
|                                     | <b>Level 1</b> | 40  | 40  | 40  | 40  | 40  |

**Lecture Plan:**

| S. No | Course Outcome | Intended Learning Outcomes (ILO)                                                     | Knowledge Level of ILO | No. of Hours | Pedagogy                | Teaching aids |
|-------|----------------|--------------------------------------------------------------------------------------|------------------------|--------------|-------------------------|---------------|
| 1     | CO 1           | Dissemination of Vision, Mission of the Dept. and PEOs, Pos, & PSOs of the Programme |                        | 1            | Lecture                 | IFP           |
|       |                | <b>Data Representation:<br/>Digital Logic Circuits-I:</b>                            |                        |              |                         |               |
| 2     |                | Explain Binary Numbers.                                                              | K2                     | 3            | Lecture with Discussion | IFP           |
| 3     |                | Explain Fixed Point Representation.                                                  | K2                     | 1            | Lecture with Discussion | IFP           |
| 4     |                | Explain Floating Point Representation.                                               | K2                     | 1            | Lecture with Discussion | IFP           |
| 5     |                | Describe Signed binary umbers.                                                       | K1                     | 1            | Lecture with Discussion | IFP           |
| 6     |                | Explain Basic Logic Functions, Logic gates                                           | K2                     | 2            | Lecture with Discussion | IFP           |
| 7     |                | Explain universal logic gates,                                                       | K2                     | 1            | Lecture with Discussion | IFP           |
| 8     |                | Describe Minimization of Logic expressions. K-Map Simplification.                    | K1                     | 2            | Lecture with Discussion | IFP           |
| 9     |                | Illustrate the Combinational Circuits, Decoders, Multiplexers                        | K2                     | 2            | Lecture with Discussion | IFP           |
|       |                | <b>Total</b>                                                                         |                        | <b>14</b>    |                         |               |

| S.No | Course Outcome | Intended Learning Outcomes (ILO)                                     | Knowledge Level of ILO | No. of Hours | Pedagogy                | Teaching aids |
|------|----------------|----------------------------------------------------------------------|------------------------|--------------|-------------------------|---------------|
|      |                | <b>Digital Logic Circuits-II:<br/>Basic Structure of Computers:</b>  |                        |              |                         |               |
| 10   | CO 2           | Explain Sequential Circuits, Flip-Flops,                             | K2                     | 2            | Lecture with Discussion | IFP           |
| 11   |                | Explain Binary counters, Registers                                   | K2                     | 2            | Lecture with Discussion | IFP           |
| 12   |                | Explain Shift Registers, Ripple counters                             | K2                     | 2            | Lecture                 | IFP           |
| 13   |                | Explain Computer Types, Functional units, Basic operational concepts | K2                     | 2            | Lecture with Discussion | IFP           |
| 14   |                | Explain Bus structures, Software, Performance                        | K2                     | 2            | Lecture with Discussion | IFP           |
| 15   |                | Explain multiprocessors and multi computers.                         | K2                     | 1            | Lecture with Discussion | IFP           |
| 16   |                | Explain Computer Generations, Von- Neumann Architecture              | K2                     | 2            | Lecture with Discussion | IFP           |
|      |                | <b>Total</b>                                                         |                        | <b>13</b>    |                         |               |

|-------|----------------|-------------------------------------------------------------------------------|------------------------|--------------|-------------------------|---------------|
|       |                | <b>Computer Arithmetic : Processor Organization:</b>                          |                        |              |                         |               |
| 17    | CO 3           | Describe The Addition and Subtraction of Signed Number                        | K1                     | 1            | Lecture with Discussion | IFP           |
| 18    |                | Explain Design of Fast Adders, Multiplication of Positive Numbers             | K2                     | 2            | Lecture with Discussion | IFP           |
| 19    |                | Explain Signed-operand Multiplication, Fast Multiplication, Integer Division, | K2                     | 2            | Lecture with Discussion | IFP           |
| 20    |                | Describe Floating-Point Numbers and Operations                                | K1                     | 1            | Lecture with Discussion | IFP           |
| 21    |                | Describe the Fundamental Concepts in execution of instruction.                | K1                     | 1            | Lecture                 | IFP           |
| 22    |                | Describe the Execution of instruction involves register transfer.             | K1                     | 1            | Lecture with Discussion | IFP           |
| 23    |                | Explain the multiple bus organization.                                        | K2                     | 1            | Lecture with Discussion | IFP           |
| 24    |                | Illustrate the hardwired control unit.                                        | K2                     | 1            | Lecture with Discussion | IFP           |
| 25    |                | Illustrate the micro programmed control unit.                                 | K2                     | 2            | Lecture with Discussion | IFP           |
|       |                | <b>Total</b>                                                                  |                        | <b>12</b>    |                         |               |

| S .No | Course Outcome | Intended Learning Outcomes (ILO)                     | Knowledge Level of ILO | No. of Hours | Pedagogy                 | Teaching aids |
|-------|----------------|------------------------------------------------------|------------------------|--------------|--------------------------|---------------|
|       |                | <b>The Memory Organization:</b>                      |                        |              |                          |               |
| 26    | CO 4           | Describe Basic Concepts of Memory.                   | K1                     | 1            | Lecture                  | IFP           |
| 27    |                | Discuss Semi Conductor RAM Memories.                 | K2                     | 1            | Lecture with Discussion  | IFP           |
| 28    |                | Discuss Read Only Memories.                          | K2                     | 1            | Lecture with Discussion. | IFP           |
| 29    |                | Describe Speed, Size and Cost of memories.           | K1                     | 1            | Lecture with Discussion  | IFP           |
| 30    |                | Illustrate the cache memory organization of computer | K2                     | 2            | Lecture with Discussion  | IFP           |
| 31    |                | Explain-Performance Considerations                   | K2                     | 1            | Lecture with Discussion  | IFP           |
| 32    |                | Illustrate Virtual Memories                          | K2                     | 2            | Lecture with Discussion  | IFP           |
| 33    |                | Explain Memory-Management Requirements.              | K2                     | 1            | Lecture with Discussion  | IFP           |
| 34    |                | Explain Secondary Storage                            | K2                     | 2            | Lecture with Discussion  | IFP           |
|       |                | <b>Total</b>                                         |                        | <b>12</b>    |                          |               |

|       |                | <b>Input/Output Organization:</b>      |                        |              |                         |               |
| 35    | <b>CO 5</b>    | Describe the Accessing of I/O Devices. | K1                     | 1            | Lecture                 | BB/ICT        |
| 36    |                | Demonstrate interrupt of I/O Devices.  | K2                     | 2            | Lecture with Discussion | BB/ICT        |
| 37    |                | Illustrate Processor Examples          | K2                     | 1            | Lecture                 | IFP           |
| 38    |                | Demonstrate Direct Memory Access       | K2                     | 2            | Lecture with Discussion | IFP           |
| 39    |                | Explain the Buses and its types.       | K2                     | 2            | Lecture with Discussion | IFP           |
| 40    |                | Illustrate Interface Circuits          | K2                     | 1            | Lecture with Discussion | IFP           |
| 41    |                | Illustrate Standard I/O Interfaces     | K2                     | 2            | Lecture with Discussion | IFP           |
|       |                | <b>Total</b>                           |                        | <b>11</b>    |                         |               |

**Total No. of Classes: 63**

# Advanced Data Structures and Algorithm Analysis

Academic Year: 2024-25

Programme: B.Tech

Year/ Semester: III

Section: A,B,C& D

Name of the Course: Advanced Data Structures and Algorithm Analysis

Course Code: V23CST04

## LESSON PLAN

**COURSE OUTCOMES (Along with Knowledge Level):** After completion of this course, the students will be able to:

| S. No | CO. No | Course Outcomes                                                                           | BTL |
|-------|--------|-------------------------------------------------------------------------------------------|-----|
| 1     | CO1    | Demonstrate asymptotic notations and nonlinear data structures like AVL Trees and B-Trees | K3  |
| 2     | CO2    | Demonstrate graphs and Divide and conquer technique                                       | K3  |
| 3     | CO3    | Use Greedy and Dynamic programming techniques to determine various problems               | K3  |
| 4     | CO4    | Develop algorithms using Backtracking and Branch & Bound techniques                       | K3  |
| 5     | CO5    | Solve different graph problems using NP Hard and NP Complete Problems.                    | K3  |

### **Text Books:**

1. Fundamentals of Data Structures in C++, Horowitz, Ellis; Sahni, Sartaj; Mehta, Dinesh, 2nd Edition Universities Press.
2. Computer Algorithms in C++, Ellis Horowitz, Sartaj Sahni, Sanguthevar Rajasekaran, 2nd Edition University Press

### **Reference Books:**

1. Data Structures and program design in C, Robert Kruse, Pearson Education Asia
2. An introduction to Data Structures with applications, Trembley & Sorenson, McGraw Hill
3. The Art of Computer Programming, Vol.1: Fundamental Algorithms, Donald E Knuth, Addison-Wesley, 1997.
4. Data Structures using C & C++: Langsam, Augenstein & Tanenbaum, Pearson, 1995.
5. Algorithms + Data Structures & Programs, N. Wirth, PHI.
6. Fundamentals of Data Structures in C++: Horowitz Sahni & Mehta, Galgottia Pub.
7. Data structures in Java, Thomas Standish, Pearson Education Asia

### **Targeted Proficiency Level and Targeted level of Attainment (for each Course Outcome):**

| Course Outcome | Targeted Proficiency Level<br>(% of Marks) | Targeted level of Attainment (%<br>Students) |
|----------------|--------------------------------------------|----------------------------------------------|
| V23CST04.1     | 60                                         | 65                                           |
| V23CST04.2     | 60                                         | 65                                           |
| V23CST04.3     | 60                                         | 60                                           |
| V23CST04.4     | 60                                         | 60                                           |
| V23CST04.5     | 60                                         | 60                                           |

**LESSON PLAN**

| S. No | Course Outcome | Intended Learning Outcomes (ILO)            | Knowledge Level of ILO | No. of Hours | Pedagogy            | Teaching aids |
|-------|----------------|---------------------------------------------|------------------------|--------------|---------------------|---------------|
| 1     | <b>CO1</b>     | Describe Asymptotic Notations with examples | K2                     | 2            | Lecture+ Discussion | IFP           |
| 2     |                | Explain insertion and deletion in AVL Trees | K2                     | 3            | Lecture+ Discussion |               |
| 3     |                | Construct AVL Trees                         | K3                     | 1            | Lecture+            |               |
| 4     |                | Discuss Applications of AVL Trees           | K2                     | 1            | Discussion          |               |
| 5     |                | Explain insertion and deletion in B Trees   | K2                     | 2            | Lecture             |               |
| 6     |                | Construct B Trees of different orders       | K3                     | 1            | Lecture+ Discussion |               |
|       |                | <b>Total</b>                                |                        | <b>10</b>    |                     |               |

| S. No | Course Outcome | Intended Learning Outcomes (ILO)                                    | Knowledge Level of ILO | No. of Hours | Pedagogy            | Teaching aids |
|-------|----------------|---------------------------------------------------------------------|------------------------|--------------|---------------------|---------------|
| 1     | <b>CO2</b>     | Describe Min and Max Heaps                                          | K2                     | 1            | Lecture+ Discussion | IFP           |
| 2     |                | Illustrate operations and applications of Min and Max Heaps         | K3                     | 2            | Lecture+ Discussion |               |
| 3     |                | Discuss Graph terminology, representations, Search & Traversals     | K2                     | 4            | Lecture+ Discussion |               |
| 4     |                | Explain Connected and Bi connected Components                       | K2                     | 3            | Lecture             |               |
| 5     |                | Use Divide and Conquer in General Method, Quick Sort and Merge Sort | K3                     | 4            | Lecture+ Discussion |               |
| 6     |                | Illustrate Strassen's Matrix Multiplication and Convex Hull         | K3                     | 3            | Lecture             |               |
|       |                | <b>Total</b>                                                        |                        | <b>17</b>    |                     |               |

| S. No | Course Outcome | Intended Learning Outcomes (ILO)                                            | Knowledge Level of ILO | No. of Hours | Pedagogy            | Teaching aids |
|-------|----------------|-----------------------------------------------------------------------------|------------------------|--------------|---------------------|---------------|
| 1     | <b>CO3</b>     | Discuss Greedy and Dynamic Programming techniques                           | K2                     | 1            | Lecture             | IFP           |
| 2     |                | Illustrate Job Sequencing with deadlines                                    | K3                     | 2            | Lecture+ Discussion |               |
| 3     |                | Explain Knapsack Problem                                                    | K2                     | 2            | Lecture+ Discussion |               |
| 4     |                | Construct Minimum Cost Spanning Trees using Prim's and Kruskal's algorithms | K2                     | 3            | Lecture             |               |
| 5     |                | Find single source shortest path using Dijkstra's algorithm                 | K2                     | 2            | Lecture             |               |
|       |                | <b>Total</b>                                                                |                        | <b>10</b>    |                     |               |

| S. No | Course Outcome | Intended Learning Outcomes (ILO)                                                   | Knowledge Level of ILO | No. of Hours | Pedagogy             | Teaching aids |
|-------|----------------|------------------------------------------------------------------------------------|------------------------|--------------|----------------------|---------------|
| 1     | CO4            | Solve Complex problems using General Method                                        | K3                     | 2            | Lecture + Discussion | IFP           |
| 2     |                | Illustrate Single Source Shortest Paths – General Weights (Bellman-Ford Algorithm) | K3                     | 2            | Lecture + Discussion |               |
| 3     |                | Construct Optimal Binary Search Trees                                              | K3                     | 1            | Lecture + Discussion |               |
| 4     |                | Explain 0/1 Knapsack problem                                                       | K2                     | 2            | Lecture + Discussion |               |
| 5     |                | Describe String Editing                                                            | K2                     | 1            | Lecture + Discussion |               |
| 6     |                | Illustrate Travelling Salesperson Problem (TSP)                                    | K3                     | 2            | Lecture + Discussion |               |
| 7     |                | Illustrate General Method in backtracking,                                         | K3                     | 1            | Lecture + Discussion |               |
| 8     |                | Illustrate 8-Queens Problem with example                                           | K3                     | 2            | Lecture + Discussion |               |
| 9     |                | Illustrate Sum of Subsets Problem,                                                 | K3                     | 1            | Lecture + Discussion |               |
| 10    |                | Explain Graph Coloring with example                                                | K2                     | 1            | Lecture + Discussion |               |
|       |                | <b>Total</b>                                                                       |                        | <b>15</b>    |                      |               |

| S. No | Course Outcome | Intended Learning Outcomes (ILO)                  | Knowledge Level of ILO | No. of Hours | Pedagogy             | Teaching aids |
|-------|----------------|---------------------------------------------------|------------------------|--------------|----------------------|---------------|
| 1     | CO 5           | Illustrate NP Hard and NP Complete Problems       | K2                     | 3            | Lecture + Discussion | IFP           |
| 2     |                | Explain Cook's Theorem                            | K3                     | 2            | Lecture + Discussion |               |
| 3     |                | Illustrate NP Hard Graph Problems: CDP, CNDP, TSP | K3                     | 4            | Lecture+ Discussion  |               |
| 4     |                | Illustrate NP Hard Scheduling Problems            | K3                     | 2            | Lecture+ Discussion  |               |
| 5     |                | Illustrate Job Shop scheduling with example       | K3                     | 2            | Lecture+ Discussion  |               |
|       |                | <b>Total</b>                                      |                        | <b>13</b>    |                      |               |

**Total No. of Classes: 65**

# Object Oriented Programming Through Java

Academic Year: 2024-25

Year/ Semester: III

Name of the Course: Object Oriented Programming Through Java

Course Code: V23CST05

Programme: B.Tech

Section: A,B,C& D

## LESSON PLAN

**COURSE OUTCOMES (Along with Knowledge Level):** After completion of this course, the students will be able to:

| S. No. | CO No. | Course Outcome                                                                                           | BTL |
|--------|--------|----------------------------------------------------------------------------------------------------------|-----|
| 1.     | CO1    | Demonstrate the object-oriented programming principles with Java programming environment.                | K3  |
| 2.     | CO2    | Demonstrate the concepts like classes, objects, argument passing mechanism, overloading, and overriding. | K3  |
| 3.     | CO3    | Illustrate the concepts of arrays, inheritance, and interfaces.                                          | K3  |
| 4.     | CO4    | Demonstrate packages, java libraries, exception handling, java I/O, and File concepts.                   | K3  |
| 5.     | CO5    | Illustrate the concepts of string handling, multithreading, and Java FX GUI.                             | K3  |

### **Textbooks:**

1. JAVA one step ahead, Anitha Seth, B.L.Juneja, Oxford.
2. Joy with JAVA, Fundamentals of Object Oriented Programming, Debasis Samanta, Monalisa Sarma, Cambridge, 2023..
3. JAVA 9 for Programmers, Paul Deitel, Harvey Deitel, 4th Edition, Pearson.

### **Reference Books:**

1. The complete Reference Java, 11th edition, Herbert Schildt, TMH
2. Introduction to Java programming, 7th Edition, Y Daniel Liang, Pearson

### **Targeted Proficiency and attainment Levels (for each Course Outcome):**

| COs                                  | CO1 | CO2 | CO3 | CO4 |
|--------------------------------------|-----|-----|-----|-----|
| Targeted Proficiency Level           | 60  | 60  | 60  | 60  |
| Targeted level of Attainment Level 3 | 60  | 60  | 60  | 60  |
| Targeted level of Attainment Level 2 | 55  | 55  | 55  | 55  |
| Targeted level of Attainment Level 1 | 50  | 50  | 50  | 50  |

**Lecture Plan:**

| S.No | Course Outcome | Intended Learning Outcomes (ILO)                        | Knowledge Level of ILO | No. of Hours Required | Pedagogy                | Teaching Aids |
|------|----------------|---------------------------------------------------------|------------------------|-----------------------|-------------------------|---------------|
| 1    | CO1            | Syllabus, Cos and POs                                   |                        |                       |                         |               |
|      |                | Introduction to Object-Oriented Programming             | K2                     | 1                     | Lecture with Discussion | IFP           |
| 2    |                | Explain Java's Features and its History                 | K2                     | 1                     | Lecture                 | IFP           |
| 3    |                | Discuss Java Program Structure and Syntax               | K2                     | 1                     | Lecture with Examples   | IFP           |
| 4    |                | Describe Data Types, Variables, and Operators           | K2                     | 2                     | Lecture with Examples   | IFP           |
| 5    |                | Explain Control Statements and Looping Constructs       | K2                     | 2                     | Lecture with Discussion | IFP           |
| 6    |                | Discuss Command Line Arguments and User Input Handling  | K2                     | 2                     | Lecture                 | IFP           |
| 7    |                | Illustrate the Concept of Static Variables and Methods  | K2                     | 1                     | Lecture                 | IFP           |
| 8    |                | Explain Java's Memory Management and Garbage Collection | K2                     | 2                     | Lecture with Discussion | IFP           |
| 9    |                | Demonstrate Basic Java Programs                         | K3                     | 3                     | Practical Session       | IFP           |
| 10   |                | Discuss Programming Style and Best Practices            | K2                     | 1                     | Lecture                 | IFP           |
| 11   |                | Explain Type Casting and Type Promotion                 | K2                     | 2                     | Lecture with Examples   | IFP           |
|      |                | <b>Total</b>                                            |                        | 18                    |                         |               |

| S. No. | Course Outcome | Intended Learning Outcomes (ILO)                    | Knowledge Level of ILO | No. of Hours Required | Pedagogy                | Teaching Aids |
|--------|----------------|-----------------------------------------------------|------------------------|-----------------------|-------------------------|---------------|
| 1      | CO2            | Introduction to Classes and Objects                 | K2                     | 1                     | Lecture                 | IFP           |
| 2      |                | Describe Class Declaration and Object Instantiation | K2                     | 2                     | Lecture with Examples   | IFP           |
| 3      |                | Explain Constructors and Constructor Overloading    | K2                     | 2                     | Lecture with Discussion | IFP           |
| 4      |                | Discuss Method Overloading and Overriding           | K2                     | 2                     | Lecture with Examples   | IFP           |
| 5      |                | Explain the use of the this Keyword                 | K2                     | 1                     | Lecture                 | IFP           |
| 6      |                | Illustrate Access Modifiers and Access Control      | K2                     | 1                     | Lecture                 | IFP           |
| 7      |                | Discuss Passing Arguments by Value and Reference    | K2                     | 2                     | Lecture with Examples   | IFP           |
| 8      |                | Explain Nested and Inner Classes                    | K2                     | 1                     | Lecture                 | IFP           |
| 9      |                | Demonstrate Object Cloning and Copying Objects      | K3                     | 2                     | Practical Session       | IFP           |

|    |  |                                                           |    |           |                   |     |
|----|--|-----------------------------------------------------------|----|-----------|-------------------|-----|
| 10 |  | Discuss Final Classes and Methods                         | K2 | 1         | Lecture           | IFP |
| 11 |  | Illustrate Real-world Applications of Classes and Objects | K3 | 2         | Practical Session | IFP |
|    |  | <b>Total</b>                                              |    | <b>17</b> |                   |     |

| S.No | Course Outcome | Intended Learning Outcomes (ILO)                                  | Knowledge Level of ILO | No. of Hours Required | Pedagogy                | Teaching Aids |
|------|----------------|-------------------------------------------------------------------|------------------------|-----------------------|-------------------------|---------------|
| 1    | CO3            | Introduction to Arrays                                            | K2                     | 1                     | Lecture                 | IFP           |
| 2    |                | Discuss Array Declaration and Initialization                      | K2                     | 2                     | Lecture with Examples   | IFP           |
| 3    |                | Explain Two-dimensional and Multidimensional Arrays               | K2                     | 2                     | Lecture with Examples   | IFP           |
| 4    |                | Illustrate Array Operations and Methods                           | K2                     | 2                     | Lecture                 | IFP           |
| 5    |                | Explain the Concept of Inheritance and its Types                  | K2                     | 2                     | Lecture with Examples   | IFP           |
| 6    |                | Discuss Method Overriding and Dynamic Method Dispatch             | K2                     | 2                     | Lecture with Discussion | IFP           |
| 7    |                | Illustrate the Use of the super Keyword and Constructor Chaining  | K2                     | 2                     | Lecture with Examples   | IFP           |
| 8    |                | Explain Interfaces and Abstract Classes                           | K2                     | 2                     | Lecture with Examples   | IFP           |
| 9    |                | Discuss Implementing Multiple Interfaces                          | K2                     | 1                     | Lecture                 | IFP           |
| 10   |                | Demonstrate Real-world Applications of Inheritance and Interfaces | K3                     | 2                     | Practical Session       | IFP           |
|      |                | <b>Total</b>                                                      |                        | <b>18</b>             |                         |               |

| S.No | Course Outcome | Intended Learning Outcomes (ILO)                              | Knowledge Level of ILO | No. of Hours Required | Pedagogy                | Teaching Aids |
|------|----------------|---------------------------------------------------------------|------------------------|-----------------------|-------------------------|---------------|
| 1    | CO4            | Introduction to Packages and Access Control                   | K2                     | 1                     | Lecture                 | IFP           |
| 2    |                | Discuss Importing and Creating Packages                       | K2                     | 2                     | Lecture with Examples   | IFP           |
| 3    |                | Explain Java's Built-in Packages (java.lang, java.util, etc.) | K2                     | 2                     | Lecture                 | IFP           |
| 4    |                | Discuss Exception Handling Mechanisms                         | K2                     | 2                     | Lecture with Examples   | IFP           |
| 5    |                | Explain the Use of try, catch, and finally Blocks             | K2                     | 2                     | Lecture                 | IFP           |
| 6    |                | Illustrate Custom Exceptions and Exception Hierarchies        | K2                     | 2                     | Lecture with Discussion | IFP           |

|   |  |                                             |    |           |                       |     |
|---|--|---------------------------------------------|----|-----------|-----------------------|-----|
| 7 |  | Explain Java I/O and File Handling Concepts | K2 | 2         | Lecture with Examples | IFP |
| 8 |  | Discuss Byte Streams and Character Streams  | K2 | 2         | Lecture with Examples | IFP |
| 9 |  | Demonstrate File I/O Operations             | K3 | 2         | Practical Session     | IFP |
|   |  | <b>Total</b>                                |    | <b>17</b> |                       |     |

| S.No | Course Outcome | Intended Learning Outcomes (ILO)                          | Knowledge Level of ILO | No. of Hours Required | Pedagogy                | Teaching Aids |
|------|----------------|-----------------------------------------------------------|------------------------|-----------------------|-------------------------|---------------|
| 1    | CO5            | Introduction to Strings and String Handling               | K2                     | 1                     | Lecture                 | IFP           |
| 2    |                | Discuss String Methods and Operations                     | K2                     | 2                     | Lecture with Examples   | IFP           |

**Total No. of Classes: 87**

# Advanced Data Structures and Algorithm Analysis Lab

Academic Year: 2024-25

Year/ Semester: III

Name of the Course: Advanced Data Structures and Algorithm Analysis Lab

Course Code: V23CSL04

Programme: B.Tech

Section: A,B,C& D

## LESSON PLAN

**COURSE OUTCOMES (Along with Knowledge Level):** After completion of this course, the students will be able to:

| S.No. | CO No. | Course Outcome                                                         | BTL |
|-------|--------|------------------------------------------------------------------------|-----|
| 1.    | CO1    | Demonstrate programs on AVL Trees and Heap trees.                      | K3  |
| 2.    | CO2    | Develop programs on Sorting algorithms and Graph traversal algorithms. | K3  |
| 3.    | CO3    | Develop programs using Greedy and Dynamic programming technique.       | K3  |
| 4.    | CO4    | Develop programs using Backtracking and branch & Bound technique.      | K3  |

### **Reference Books:**

1. Fundamentals of Data Structures in C++, Horowitz Ellis, SahniSartaj, Mehta, Dinesh, 2<sup>nd</sup>Edition, Universities Press
2. Computer Algorithms/C++ Ellis Horowitz, SartajSahni, SanguthevarRajasekaran, 2<sup>nd</sup>Edition, University Press
3. Data Structures and program design in C, Robert Kruse, Pearson Education Asia
4. An introduction to Data Structures with applications, Trembley& Sorenson, McGraw Hill

### **Targeted Proficiency and attainment Levels (for each Course Outcome):**

| Course Outcome | Targeted Proficiency Level<br>(% of Marks) | Targeted level of Attainment (%<br>Students) |
|----------------|--------------------------------------------|----------------------------------------------|
| V23CSL04.1     | 60                                         | 65                                           |
| V23CSL04.2     | 60                                         | 65                                           |
| V23CSL04.3     | 60                                         | 60                                           |
| V23CSL04.4     | 60                                         | 60                                           |

Lecture Plan:

| S.No. | Course Outcome | Program Name                                                                                                                                                                                            | Knowledge Level | No. of Hours | Pedagogy            | Teaching Aids |
|-------|----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|--------------|---------------------|---------------|
| 1     | <b>CO1</b>     | Construct an AVL tree for a given set of elements which are stored in a file. And implement insert and delete operation on the constructed tree. Write contents of tree into a new file using in-order. | K3              | 6            | Lecture& Experiment | IFP           |
| 2     |                | Construct B-Tree an order of 5 with a set of 100 random elements stored in array. Implement searching, insertion, and deletion operations.                                                              |                 |              |                     |               |
| 3     | <b>CO2</b>     | Construct Min and Max Heap using arrays, delete any element, and display the content of the Heap.                                                                                                       | K3              | 12           | Lecture& Experiment | IFP           |
| 4     |                | Demonstrate BFT and DFT for given graph when graph is represented by a) Adjacency Matrix b) Adjacency Lists.                                                                                            |                 |              |                     |               |
| 5     |                | Develop a program for finding the bi connected components in a given graph.                                                                                                                             |                 |              |                     |               |
| 6     |                | Implement Quick sort and Merge sort and observe the execution time for various input sizes (Average, Worst, and Best cases).                                                                            |                 |              |                     |               |
| 7     |                | Examine the performance of Single Source Shortest Paths using Greedy method when the graph is represented by adjacency matrix and adjacency lists.                                                      |                 |              |                     |               |
| 8     | <b>CO3</b>     | Demonstrate Job Sequencing with deadlines using Greedy strategy.                                                                                                                                        | K3              | 6            | Lecture& Experiment | IFP           |
| 9     |                | Demonstrate a program to solve 0/1 Knapsack problem using Dynamic Programming.                                                                                                                          |                 |              |                     |               |
| 10    | <b>CO4</b>     | Demonstrate N-Queens Problem using Backtracking.                                                                                                                                                        | K3              | 9            | Lecture& Experiment | IFP           |
| 11    |                | Use Backtracking strategy to solve 0/1 Knapsack problem.                                                                                                                                                |                 |              |                     |               |
| 12    |                | Demonstrate Travelling Sales Person problem using Branch and Bound approach.                                                                                                                            |                 |              |                     |               |

**Total No. of Hours: 33**

# Object Oriented Programming through Java Lab

Academic Year: 2024-25

Year/ Semester: III

Name of the Course: Object Oriented Programming through Java Lab

Course Code: V23CSL05

Programme: B.Tech

Section: A,B,C& D

## LESSON PLAN

**COURSE OUTCOMES (Along with Knowledge Level):** After completion of this course, the students will be able to:

| S. No. | CO No. | Course Outcome                                                | BTL  |
|--------|--------|---------------------------------------------------------------|------|
| 1.     | CO1    | Construct programs to handle classes and objects.             | [K3] |
| 2.     | CO2    | Develop programs that incorporate inheritance and interfaces. | [K3] |
| 3.     | CO3    | Construct programs on exception handling and File I/O.        | [K3] |
| 4.     | CO4    | Develop programs using multithreading and Java FX.            | [K3] |

### **Text Books:**

1. JAVA one step ahead, Anitha Seth, B.L. Juneja, Oxford.
2. Joy with JAVA, Fundamentals of Object Oriented Programming, Debasis Samanta, Monalisa Sarma, Cambridge, 2023.
3. JAVA 9 for Programmers, Paul Deitel, Harvey Deitel, 4th Edition, Pearson.

### **Targeted Proficiency Level and Targeted level of Attainment (for each Course Outcome):**

| COs                                  | CO1 | CO2 | CO3 | CO4 |
|--------------------------------------|-----|-----|-----|-----|
| Targeted Proficiency Level           | 80  | 80  | 80  | 80  |
| Targeted level of Attainment Level 3 | 75  | 75  | 75  | 75  |
| Targeted level of Attainment Level 2 | 70  | 70  | 70  | 70  |
| Targeted level of Attainment Level 1 | 65  | 65  | 65  | 65  |

**Lecture Plan:**

| Exp. No | Course Outcome | Intended Learning Outcomes (ILO)                                                                                                                                         | Knowledge Level of ILO | No. of Hours | Pedagogy                   | Teaching aids |
|---------|----------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|--------------|----------------------------|---------------|
| 1       | CO1            | Develop a JAVA program to display default values of all primitive data types of JAVA.                                                                                    | K3                     | 15           | Demonstration & Experiment | ICT           |
| 2       |                | Develop a JAVA program that displays the roots of a quadratic equation $ax^2+bx+c=0$ . Find the discriminant D and basing on value of D, describe the nature of the root |                        |              |                            | ICT           |
| 3       |                | Develop a JAVA program to search for an element in a given list of elements using binary search.                                                                         |                        |              |                            | ICT           |
| 4       |                | Develop a JAVA program to sort the list of elements using bubble sor                                                                                                     |                        |              |                            | ICT           |
| 5       |                | Develop a JAVA program using String Buffer to delete, remove character.                                                                                                  |                        |              |                            | ICT           |
| 6       |                | Develop a JAVA program to implement class Mechanism. Build a class, methods and invoke them inside main method.                                                          |                        |              |                            | ICT           |
| 7       |                | Develop a JAVA program to implement method overloading.                                                                                                                  |                        |              |                            | ICT           |
| 8       |                | Develop a JAVA program to implement constructor.                                                                                                                         |                        |              |                            | ICT           |
| 9       |                | Develop a JAVA program to implement constructor overloading.                                                                                                             |                        |              |                            | ICT           |
| 10      | CO2            | Develop a JAVA program to implement Single Inheritance.                                                                                                                  | K3                     | 9            | Demonstration & Experiment | ICT           |
| 11      |                | Develop a JAVA program to implement multi level Inheritance.                                                                                                             |                        |              |                            | ICT           |
| 12      |                | c) Develop a JAVA program for abstract class to find areas of different shapes.                                                                                          |                        |              |                            | ICT           |
| 13      |                | a) Develop a JAVA program on —superl keyword.                                                                                                                            |                        |              |                            | ICT           |
| 14      |                | b) Develop a JAVA program to implement Interface. What kind of Inheritance can be achieved?                                                                              |                        |              |                            | ICT           |
| 15      |                | c) Develop a JAVA program that implements Runtime polymorphism.                                                                                                          |                        |              |                            | ICT           |

|    |     |                                                                                                                                                                                                                                                                       |    |    |                            |     |
|----|-----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----|----|----------------------------|-----|
| 16 | CO3 | Exercise – 6:<br>a) Develop a JAVA program that describes exception handling mechanism                                                                                                                                                                                | K3 | 9  | Demonstration & Experiment | ICT |
| 17 |     | Develop a JAVA program on Multiple catch clauses.                                                                                                                                                                                                                     |    |    |                            | ICT |
| 18 |     | Develop a JAVA program to generate Built-in Exceptions.                                                                                                                                                                                                               |    |    |                            | ICT |
| 19 |     | Develop a JAVA program to generate User Defined Exception.                                                                                                                                                                                                            |    |    |                            | ICT |
| 20 | CO4 | Develop a JAVA program that creates threads by extending Thread class. First thread display Good Morning —every 1 sec, the second thread displays —Hello —every 2 seconds and the third display —Welcomell every 3 seconds,(Repeat the same by implementing Runnable) | K3 | 15 | Demonstration & Experiment | ICT |
| 21 |     | b) Develop a program on isAlive() and join ().                                                                                                                                                                                                                        |    |    |                            | ICT |
| 22 |     | c) Demonstrate Daemon Threads.                                                                                                                                                                                                                                        |    |    |                            | ICT |
| 23 |     | Demonstrate Producer Consumer Problem.                                                                                                                                                                                                                                |    |    |                            | ICT |
| 24 |     | a) Develop a JAVA program that import and use the user defined packages.                                                                                                                                                                                              |    |    |                            | ICT |
| 25 |     | b) Demonstrate a GUI that display text in label and image in an ImageView (use JavaFX) Without writing any code.                                                                                                                                                      |    |    |                            | ICT |
| 26 |     | Develop a Tip Calculator app using several JavaFX components and learn how to respond to user interactions with the GUI                                                                                                                                               |    |    |                            | ICT |

**Total No. of Classes:48**

# Design Thinking and Innovation

Academic Year: 2024-25

Year/ Semester: III

Name of the Course: Design Thinking and Innovation

Programme: B.Tech

Section: A,B,C& D

CourseCode: V23MET09

## LESSON PLAN

**COURSE OUTCOMES (Along with Knowledge Level):** After completion of this course, the students will be able to:

| S. No | CO. No | Course Outcomes                                                     | BTL |
|-------|--------|---------------------------------------------------------------------|-----|
| 1     | CO1    | Bring awareness on innovative design and new product development.   | K1  |
| 2     | CO2    | Explain the basics of design thinking.                              | K2  |
| 3     | CO3    | Familiarize the role of reverse engineering in product development. | K3  |
| 4     | CO4    | Train how to identify the needs of society and convert into demand. | K4  |
| 5     | CO5    | Introduce product planning and product development process.         | K5  |

### **Text Books:**

1. Tim Brown, Change by design, 1/e, Harper Bollins, 2009.
2. Idris Mootee, Design Thinking for Strategic Innovation, 1/e, Adams Media, 2014.

### **Reference Books:**

1. David Lee, Design Thinking in the Classroom, Ulysses press, 2018.
2. Shrrutin N Shetty, Design the Future, 1/e, Norton Press, 2018.
3. William lidwell, Kritinaholden, & Jill butter, Universal principles of design, 2/e, Rockport Publishers, 2010.
4. Chesbrough.H, The era of open innovation, 2003.

### **Targeted Proficiency and Attainment Levels (for each Course Outcome):**

| Cos                                 |                | CO1 | CO2 | CO3 | CO4 | CO5 |
|-------------------------------------|----------------|-----|-----|-----|-----|-----|
| <b>Targeted Proficiency Level</b>   |                | 70  | 70  | 70  | 65  | 65  |
| <b>Targeted level of Attainment</b> | <b>Level 3</b> | 60  | 60  | 60  | 60  | 60  |
|                                     | <b>Level 2</b> | 50  | 50  | 50  | 50  | 50  |
|                                     | <b>Level 1</b> | 50  | 50  | 50  | 50  | 50  |

**Lecture Plan:**

| S.No | Course Outcome | Intended Learning Outcomes (ILO)                                                                          | Knowledge Level of ILO | No. of Hours | Pedagogy                                        | Teaching aids    |
|------|----------------|-----------------------------------------------------------------------------------------------------------|------------------------|--------------|-------------------------------------------------|------------------|
| 1    | <b>CO1</b>     | Introduction to OBE, Dissemination of Vision, Mission of the Dept. and PEOs, POs & PSOs of the Programme. |                        | 1            | Lecture                                         | IFP              |
| 2    |                | Identify the elements of design thinking.                                                                 | K1                     | 1            | Lecture                                         | Charts + crayons |
| 3    |                | State the principles of design.                                                                           | K1                     | 1            | Lecture                                         | IFP              |
| 4    |                | Discuss the importance and challenges of Design Thinking process.                                         | K2                     | 2            | Lecture with discussion                         | IFP              |
| 5    |                | Explain the history of Design Thinking                                                                    | K1                     | 1            | Lecture + Discussion                            | IFP              |
| 6    |                | Explain about new products available in the market                                                        | K2                     | 1            | Lecture + Discussion                            | IFP              |
| 7    |                | Explain about innovative technologies present in the society                                              | K2                     | 1            | Lecture with Discussion and in class Assignment | IFP              |
|      |                | <b>Total</b>                                                                                              |                        | <b>8</b>     |                                                 |                  |

| S.No | Course Outcome | Intended Learning Outcomes (ILO)                              | Knowledge Level of ILO | No. of Hours | Pedagogy                                        | Teaching aids |
|------|----------------|---------------------------------------------------------------|------------------------|--------------|-------------------------------------------------|---------------|
| 1    | <b>CO2</b>     | Illustrate Design Thinking Process.                           | K2                     | 1            | Lecture                                         | IFP           |
| 2    |                | Discuss the importance of Empathy.                            | K1                     | 1            | Discussion                                      | IFP           |
| 3    |                | List the problems that are identified around them.            | K2                     | 1            | Discussion                                      | IFP           |
| 4    |                | Identify problem statement                                    | K1                     | 1            | Lecture + Discussion                            | IFP           |
| 5    |                | Explain how ideas are to be converted into implementation     | K2                     | 1            | Lecture + brain storming                        | IFP           |
| 6    |                | Explain the tools involved in Design thinking.                | K2                     | 1            | Lecture with discussion and in class Assignment | IFP           |
| 7    |                | Discuss persona and how to approach end user                  | K2                     | 2            | Lecture                                         | IFP           |
| 8    |                | Explain the importance of journey map and product development | K2                     | 2            | Lecture                                         | IFP           |
|      |                | <b>Total</b>                                                  |                        | <b>10</b>    |                                                 |               |

|      |                | <b>Total</b>                                             |                        | <b>11</b>    |                                      |               |

**Total No. of Classes: 47**

# Professional Communication Skills - I

Academic Year: 2024-25

Year/ Semester: III

Name of the Course: Professional Communication Skills -III

CourseCode:V23ENT02

Programme: B.Tech

Section: A,B,C& D

## LESSON PLAN

**COURSE OUTCOMES (Along with Knowledge Level):** After completion of this course, the students will be able to:

| S. No. | CO No. | Course Outcome                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | BTL |
|--------|--------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 1.     | CO1    | Distinguish the subtle meanings of various words in different contexts, recognize similar words as well as words with contrast meanings and use them appropriately. Express writer's tone and relevant ideas using different types of writing skills and prepare a resume to showcase skills and accomplishments. Organize thoughts in the discussions and express views without reticence. Develop the ability to write different types of essays in a structured way, maintaining cohesion and logic. | K4  |
| 2.     | CO2    | Identify the central theme and arrange the scrambled sentences into a meaningful passage. Draft emails with appropriate subject-lines and relevant content. Compare different pairs of words, recognize the relationship between the head words and the options to siphon correct analogy Choose an appropriate word to make a sentence meaningful. Infer the meaning of the picture by thinking out of the box and speak without inhibitions and face interviews with aplomb.                          | K3  |
| 3.     | CO3    | Analyze appropriate methods of logical thinking on Ratio and Proportion, Partnership, LCM and HCF, Number System, Areas & Volumes.                                                                                                                                                                                                                                                                                                                                                                      | K4  |
| 4.     | CO4    | Demonstrate problem solving skills through the concepts of Percentages, Profit and loss, Simple Interest & Compound Interest and Allegation                                                                                                                                                                                                                                                                                                                                                             | K3  |
| 5.     | CO5    | Calculate the end results of Cubes, Dice and Data Analysis, Time & Work, Time & Distance, Race & Games.                                                                                                                                                                                                                                                                                                                                                                                                 | K4  |

**Targeted Proficiency Level and Targeted level of Attainment (for each Course Outcome):**

| Course Outcome | Targeted Proficiency Level (% of Marks) | Targeted level of Attainment (% Students) |
|----------------|-----------------------------------------|-------------------------------------------|
| 1              | 55                                      | 55                                        |
| 2              | 55                                      | 55                                        |
| 3              | 55                                      | 55                                        |
| 4              | 55                                      | 55                                        |
| 5              | 55                                      | 55                                        |
