SUCCESS STORIES

There are mostly three rounds to crack any company.

1. Written test comprising of
 - a. Aptitude and Reasoning
 - b. Coding test
2. Technical interviews
3. HR interview

Coming to the 1st round, from the 5th semester itself, we were trained in Aptitude and Reasoning. It helped in understanding various techniques to crack any problem in any concept in Aptitude. Understanding the concept to the fullest of any Aptitude concept is the key to crack it. Then, practicing various problems from different websites and writing mock tests helped me to gain confidence in Aptitude and Reasoning.

Competitive coding is the key to crack any coding round or technical interview. So, for that, we were trained from 6th semester itself in coding by practicing in ebox, edyot etc. After understanding the fundamentals, we were encouraged to do more and more problems in various techniques like backtracking, dynamic programming etc from various websites like leetcode, Geeksforgeeks, Codechef etc even in the lockdown time. Practicing coding problems in the lockdown time helped me so much to gain confidence in it.

For technical interviews, practicing competitive coding and understanding computer science fundamentals like DBMS, OS, Networking etc is the key. In the lockdown time, our college training faculty conducted technical interviews to gain confidence in us. They provided us with sample company specific questions to practice before interview of any company. Apart from that, understanding concepts of DBMS, OS, Networking from various open sources also helped me to crack those interviews.

For HR interview, I referred open source websites and videos to know most asked questions in any HR interview and sample answers to them.

Apart from these, for some companies, there may be managerial interview which usually conducted by team manager. It may consists of coding questions or some most asked managerial questions which we can refer from various websites or some general questions which test our logical thinking or combination of all of these. It is conducted after technical rounds and before HR round.

Practicing thoroughly and having confidence in yourself is the key to crack any company.

Go the very best!

Ms. Y.S.G Swetha Sri Bhavani
(17A81A05G7)

The campus selection process can be categorised into 3 for any company.

1. Aptitude, reasoning, English
2. Coding exam
3. Interviews

Understanding the key concept is very important for cracking any exam.

Search for aptitude, reasoning and English questions given in previous exams conducted by the particular company. Practice them. Understand the concepts. There are different resources like YouTube, textbooks for preparation.

Practicing coding problems from different websites like leetcode, gfg, codechef and problems from previous coding exams will help a lot. Hone your problem solving skills by practicing problems on important concepts like greedy, backtracking, dynamic programming etc. Problems on data structures and algorithms will be asked in different interviews. I mostly used GeeksforGeeks and YouTube to prepare for all these concepts.

Coming to technical interviews, it is important to have thorough knowledge in the fundamentals of core subjects. I used GeeksforGeeks, javatpoint for DBMS, Computer Networks, Operating Systems, C, Cpp, Java concepts, and basic of Software development. Recall all the topics you have learnt in academics and search for them in these websites to get more ideas.

You will get an idea on Hr round if you search for different questions that can be asked in Hr.

Take help from your professors.

I know all this info sounds overwhelming. Trust me, it's okay. You can figure this out. You just have to be consistent, confident and determined.

Believe in yourself. Good luck!

Ms. N. VENKATA SRI LALITHA
(17A81A0530)

These are the steps that I followed to get placed

- I started by understanding the basics of programming.
- The very next step is to start practicing competitive programming in a-bor/gfg/hackerrank/Leetcode.
- Acquire thorough knowledge on DSA, atleast the basics which taught in classroom.
- Knowledge on core concepts in OS, DBMS, Computer Networks and some Programming concepts helped me for a technical interview.
- Learnt the basic concepts of aptitude and reasoning in class, tried applying these concepts on problems in sites like Indiabix.
- For Verbal round basic English grammar structures helps.
- Projects will definitely add value but its not mandatory so don't panic.
- Being loyal to resume will help.
- I have answered every question in an interview confidently & I think its the key to crack the interview.
- Make a notes for your preparation and keep it handy, revise the notes often(the day before the interview).

Take suggestions from your lecturers. Attend every interview with a smile on your face.

Best of Luck!!

Ms. Kavyanjana Vankayala
(17A81A0549)

**“Success is not final, failure is not fatal:
it is the courage to continue that counts ”**

-Winston Churchill

BIOINFORMATICS

WHAT IS IT MEAN..?

BIOINFORMATICS
DEFINED AS THE
APPLICATIONS OF
TOOLS OF
COMPUTATION AND
ANALYSIS CAPTURE
AND INTERPRETION
OF BIOLOGICAL
DATA

BIOINFORMATICS IS LINKED WITH
STATISTICS BIOLOGY AND
COMPUTERSCIENCE

**INFORMATION TECHNOLOGY PLAYS A
VERY IMPORTANT ROLE IN HUMAN
HEALTH AREAS SUCH AS
"BIOINFORMATICS", "GENOME
SEQUENCING", BIOTECHNOLOGY", "GENE
ENGINEERING" AND MANY.**

INTRODUCTION

The development and application of computational tools to acquire, store, organize, archive, analyse and visualize biological data is called bioinformatics.

Understanding bioinformatics help in curing many severe diseases like osteoporosis, cancer, diagnose disease and also helps in human genome project The main aim of this project is to create maps of the entire set of genes in the human body by decoding almost 3 billion units of human DNA.

Bioinformatics combines Biotechnology and Information Technology. Bioinformatics mainly involves computerizing biodata, whether it be from biotechnology or any

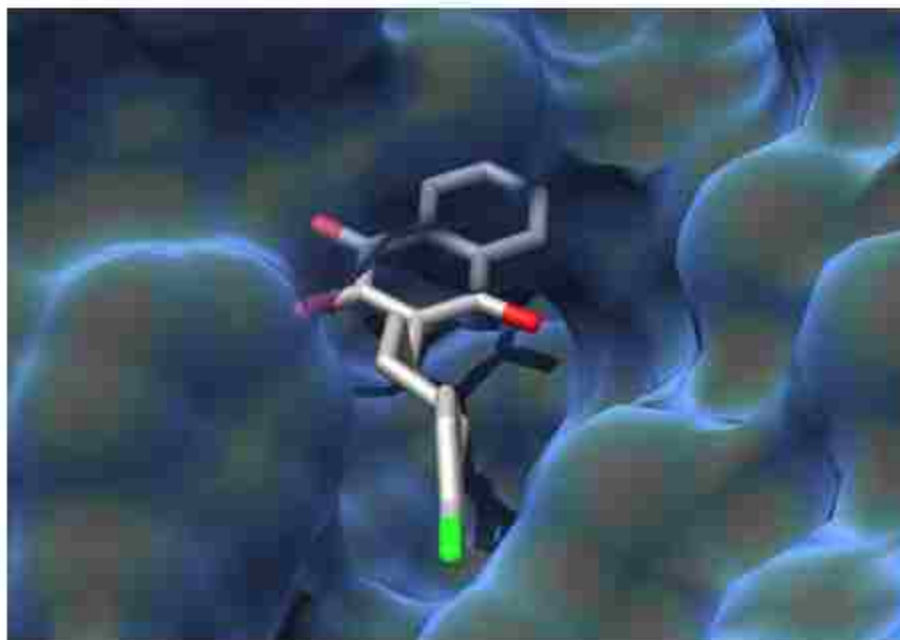

other biological science. It deals with many different subjects such as chemistry, mathematics, statistics, or computers and different kinds of programming languages like C, C++, Java and oracle.

1.CREATION OF DATABASE: INVOLVES THE ORGANISING, STORAGE AND MANAGEMENT OF THE BIOLOGICAL DATASET

2.DEVELOPMENT OF ALGORITHMS AND STATISTICS: INVOLVES THE DEVELOPMENT OF TOOLS AND RESOURCES TO DETERMINE THE RELATIONSHIP AMONG THE MEMBERS OF LARGE DATASETS.

3.ANALYSIS OF DATA INTERPRETATION: INCLUDES DNA, RNA AND PROTEIN STRUCTURE, PROTEIN SEQUENCE AND BIOCHEMICAL PATHWAYS

APPLICATION OF BIOINFORMATICS:

1.Drug discovery

2.Personalized medicine

3.preventive medicine

4.Gene therapy

CURING CANCER USING BIOINFORMATICS:

Cancer has been characterized as a heterogeneous disease consisting of many different subtypes. The early diagnosis and prognosis of a cancer type have become a necessity in cancer research, as it can facilitate the subsequent clinical management of patients. The importance of classifying cancer patients into high or low risk groups has led many

research teams, from the biomedical and the bioinformatics field, to study the application of machine

CONCLUSION:

Computer-based analysis of bio-sequences is increasingly having an impact on the field of biology. Computational bio-sequence analysis and database searching tools are now an integrated and essential part of the field, and lead to numerous important scientific discoveries in the last decade. Most of these have resulted from database searches that revealed unexpected similarities between molecules that were not previously known to be related.

BIOINFORMATICS IS THE USE OF COMPUTERS TO COLLECT AND ANALYZE BIOLOGICAL INFORMATION, ESPECIALLY FOR THE FIELD OF GENETICS AND GENOMICS.

The Bioinformatics career focuses on creating software tools to store, manage, interpret, and analyze data at the genome, proteome, transcriptome, and metabolome levels. Primary investigations consist of integrating information from DNA and protein sequences and protein structure and function

Bioinformatics is super essential for the analysis of Data in modern biology and medicine. There are several large conferences that are concerned with bioinformatics. Some of the most notable examples are Intelligent

Systems for Molecular Biology (ISMB), European Conference on Computational Biology (ECCB), and Research in Computational Molecular Biology (RECOMB).

MUTTA HARSHITHA

20A81AO5A3

OPERATING SYSTEM

An operating system is a system software that manages computer hardware, software resource and provide common services for computer programs.

There are number of operating systems in use.

The most dominate personal computer operating system is MICROSOFT WINDOWS with market share of around 76.45%

MacOS by apple inc.is in the second place 17.72%, and varieties of Linux are collectively in third place 1.73%

In mobiles ANDROID is the most dominate operating system with share in the market up to 87.5%

Apple is the second largest operating system with in mobiles with market value 12.1%

MICROSOFT WINDOWS:

Microsoft introduced an operating environment named windows on November 20,1985 as a graphical operating system shell for MS-DOS

in response to the growing in graphical user interfaces (GUIs).

Microsoft launched their operating systems according to the time and the need of the people in various version like MS-dos, Window 95, Window 98, Window ME, Window NT, Windows 2000, Windows XP, Window VISTA, Windows 7, Windows 8, Windows 10 Window 11.

Among all the operating systems in windows, the most popular window operating systems is WINDOW 10.

And next to window 10 is window 7 is the most dominating operating system used.

At present Microsoft launched a highly advanced version of window operating systems and that is WINDOW 11.

Window 11 is the highly advanced version of window operating system which is officially launched on October 05 worldwide.

MACOS:

MacOS (previously mac OS x and later OS x) is a proprietary graphical operating system developed and marketed by Apple.inc. since 2001 it is the operating system for Apple's mac computers. MacOS is the second most used desktop operating system used.

LINUX:

Just like windows, MacOS, Linux is an operating system.

Linux is a family of open-source Unix-like operating system based on the Linux kernel, an operating system kernel first released on September 17, 1991, by LINUS TORVALDS. Linux is typically packaged in Linux distribution.

Linux operating system provides high security, high stability. And it is easy to maintain, run on any hardware

Linux is completely free and user need not to pay anything.

MOBILE OPERATING SYSTEM:

Coming to mobile operating systems ANDRIOD is the most popular operating system and most used operating system in the world with market share of 72.44%. And IOS is the second largest used mobile operating system with market value of 26.75%

ANDROID:

Android is the mobile operating sysytem based on modified versions of linux kernal and other opensource,designed primarliy for touch screen mobile devices such as smartphones and tablets.

Android is developed by mostly google and the open handset alliance.

Android was intially realeased on september 23,2008

Android is also launching latest version into the market,according to the need of the people

Android versions like G1,1.5 cup-cake,1.6 donut,2.0 Eclair,2.2 froyo 2.3 gingerbread,3.0 honeycomb, 4.0 icecream sandwich,4.1 jellybean 4.4 kitkat,5.0 lolipop,6.0 marshmallow,7.0 nougat,8.0 Oreo,9.0 pie,10.0 Q,11 red velvet cake and the latest version of android is Snowcone

IOS:

It is mobile operating system developed and marketed by Apple.inc. IOS stands for I phone operating system which was first launched on June 29,2007.

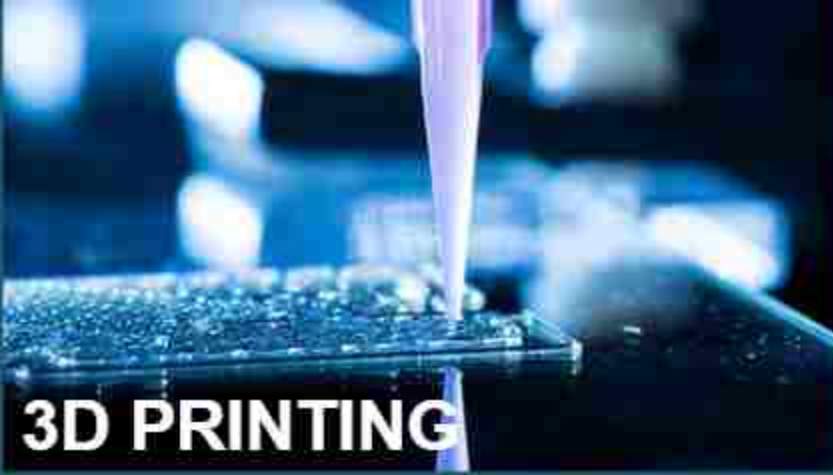

The IOS user interface is based upon direct manipulation, using multi-touch gestures such as swipe, tap, pinch and reverse pinch

IOS is easy to use with simple interface even after version upgrades, it provides multitasking.

IOS is very much popular because of it provides high security to the user and it is very faster than any operating system.

3D PRINTING

ADDITIVE MANUFACTURING TECHNOLOGY

ADDITIVE MANUFACTURING

3D printing also known as additive manufacturing, is a method of creating a three dimensional object layer-by-layer using a computer created design

3D printing is an additive process whereby layers of material are built up to create a 3D part. This is the Opposite of subtractive manufacturing

processes, where a final design is cut from a larger block of material. As a result, 3D printing creates less material wastage.

WHAT MATERIALS CAN BE USED IN 3D PRINTING?

There are a variety of 3D printing materials, including thermoplastics such as acrylonitrile butadiene styrene (ABS), metals (including powders), resins and ceramics

3D PRINTING TECHNOLOGIES

There are three broad types of 3D printing technology; sintering, melting, and stereolithography.

Sintering is a technology where the material is heated, but not to the point of melting, to create high

resolution items. Metal powder is used for direct metal laser sintering while thermoplastic powders are used for selective laser sintering.

Melting methods of 3D printing include powder bed fusion, electron beam melting and direct energy deposition, these use lasers, electric arcs or electron beams to print objects by melting the materials together at high temperatures.

Stereolithography utilises photopolymerisation to create parts. This technology uses the correct light source to interact with the material in a selective manner to cure and solidify a cross section of the object in thin layers

DIGITAL LIGHT PROCESSING (DLP)

3D printing DLP technology is very similar to Stereolithography but differs in that it uses a different light source and makes use of a liquid crystal display panel. This technology makes use of more conventional light sources and the light is controlled using micro mirrors to control the light incident on the surface of the object being resin to harden quickly printed. The liquid crystal display panel works as a photomask. This mechanism allows for a large amount of light to be projected onto the surface to be cured, thereby allowing the

FUSED DEPOSITION MODELING (FDM)

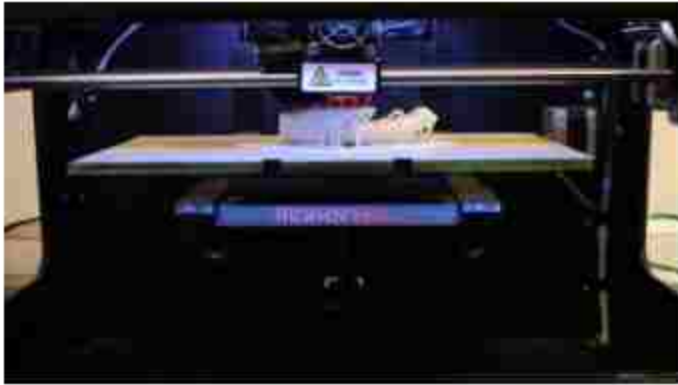

With this technology, objects can be built with production-grade thermoplastics. Objects are built by heating a thermoplastic filament to its melting point and extruding the thermoplastic layer by layer. Special techniques can be used to create complex structures. For example, the printer can extrude a second material that will serve as support material for the object being formed during the printing process. This support material can later be removed or dissolved.

SELECTIVE LASER SINTERING (SLS)

SLS has some similarities with Stereolithography. However, SLS makes use of powdered material that is placed in a vat. For each layer, a layer of powdered material is placed on top of the previous layer using a roller and then the powdered material is laser sintered according to a certain pattern for building up the object to be created. Interestingly, the portion of the powdered material that is not sintered can be used to provide the support structure and this material can be removed after the object is formed for re-use

SELECTIVE LASER MELTING (SLM)

The SLM process is very similar to the SLS process. However, unlike the SLS process where the powdered material is sintered the SLM process involves fully melting the powdered material.

ELECTRONIC BEAM MELTING (EBM)

This technology is also much like SLM. However, it makes use of an electron beam instead of a high-powered laser. The electron beam fully melts a metal powder to form the desired object. The process is slower and more expensive than for SLM with a greater limitation on the available materials.

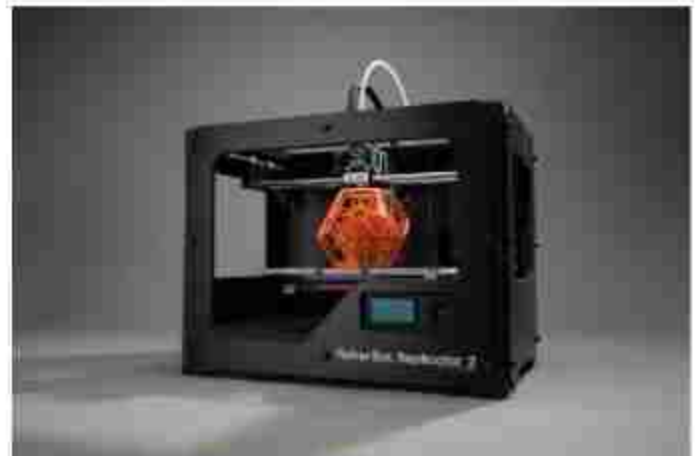

LAMINATED OBJECT MANUFACTURING (LOM)

This is a rapid prototyping system. In this process, layers of material coated with adhesive are fused together with heat and pressure and

then cut into shape using a laser cutter or knife. More specifically, a foil coated with adhesive is overlaid on the previous layer and a heated roller heats the adhesive for adhesion between the two layers

Layers can be made of paper, plastic or metal laminates. The process can include post-processing steps that include machining and drilling. This is a fast and inexpensive method of 3D

printing. With the use of an adhesion process, no chemical process is necessary and relatively large parts can be made

ADVANTAGES OF 3D PRINTING

1. **SPEED** : One of the biggest advantages of 3D printing technology is Rapid Prototyping

2. **COST** : For small production runs and applications, 3D printing is the most cost-effective manufacturing process

3. **FLEXIBILITY** : Another big advantage of 3D printing is that any given printer can create almost anything that fits within its build volume.

DISADVANTAGES OF 3D PRINTING

1. **Limited Materials** : While 3D Printing can create items in a selection of plastics and metals the available selection of raw materials is not exhaustive

2. **Large Volumes** : 3D printing is a static cost unlike more conventional techniques like injection moulding, where large volumes may be more cost effective to produce.

3. **Reduction in Manufacturing Jobs** : Another of the disadvantages

of 3D technology is the potential reduction in human labour

EXAMPLES OF 3D PRINTING

3D printing encompasses many forms of technologies and materials as 3D printing is being used in almost all industries you could think of. It's important to see it as a cluster of diverse industries with a myriad of different applications

A FEW EXAMPLES:

1. consumer products (eyewear, footwear, design, furniture)

2. industrial products (manufacturing tools, prototypes, functional end-use parts)

3. dental products

4. prosthetics

5. architectural scale models & maquettes

6. reconstructing fossils

7. replicating ancient artefacts

8. reconstructing evidence in forensic pathology

9. movie props

52.	Dr P.Laxmi Kanth	Online FDP on Including Human Values in Technical Education	Organized by AICTE	05	19.04.2021	23.04.2021
53.	A.Rajesh	FDP On "Data Science for ALL"	Jointly Organized by E & ICT,NIT Warangal, IIITDM Jabalpur, IIT Kanpur, NIT Patna, IIT Guwahathi, MNIT Jaipur, IIT Rookee	12	12.04.2021	23.04.2021

54.	A.Leelavathi	FDP On "Data Science for ALL"	Jointly Organized by E & ICT, NIT Warangal, IIITDM Jabalpur, IIT Kanpur, NIT Patna, IIT Guwahathi, MNIT Jaipur, IIT Roorkee	12	12.04.2021	23.04.2021
55.	A.Leelavathi	AICTE MARGDARSAN FDP on Outcome Based Education and NBA Accreditation for TIRE-II colleges	SRKR Engineering College, Bhimavaram	06	29.03.2021	03.04.2021
56.	P.Suneetha	AICTE Training And Learning (ATAL) Academy Online FDP on "Cyber Security"	Francis Xavier Engineering College	05	22.03.2021	26.03.2021
57.	M. Madhavi	Instructor Led Live Online Training on Deep Learning Using Medical Data	Organized by Finland Labs.	05	15.03.2021	19.03.2021

b) Conferences Attended by Faculty: 02

S.No	Name and Designation of the Faculty	Conference Paper Entitled with	Location	No. Of Days	From Date	To Date
1.	A. Rajesh	An Effective Content Management System(ECMS) for Web Portal	International Conference on Knowledge Management in Higher Education Institutions	02	07.04.2021	08.04.2021
2.	A. Leelavathi	An Effective Content Management System(ECMS) for Web Portal	International Conference on Knowledge Management in Higher Education Institutions	02	07.04.2021	08.04.2021

b) NPTEL and other Certifications by Faculty: 29

S.NO	Name of the faculty	Name of the Course certificate Attended	Certification Authority	Duration	Date
1.	Dr K.Shirin Bhanu	Deep Learning	NPTEL	12 Weeks	Jan-Apr 2021
2.	M.Chilaka Rao	Problem Solving through Programming in C	NPTEL	12 Weeks	Jan-Apr 2021
3.	A.Naga Jyothi	Problem Solving through Programming in C	NPTEL	12 Weeks	Jan-Apr 2021
4.	A.Nageswara Rao	Problem Solving through Programming in C	NPTEL	12 Weeks	Jan-Apr 2021
5.	D.Sasi Rekha	Internet Of Things	NPTEL	12 Weeks	Jan-Apr 2021
6.	P.Rajesh	Compiler Design	NPTEL	12 Weeks	Jan-Apr 2021

7.	M S Radha Mangamani	Data Analytics with Python	NPTEL	12 Weeks	Jan-Apr 2021
8.	P.Suneetha	Compiler Design	NPTEL	12 Weeks	Jan-Apr 2021
9.	P.Suneetha	Introduction to Internet of Things	NPTEL	12 Weeks	Jan-Apr 2021
10.	Ch.Hemanad	An Introduction to Programming through C++	NPTEL	12 Weeks	Jan-Apr 2021
11.	M.Anantha Lakshmi	Design and Analysis of Algorithms	NPTEL	8 Weeks	Jan-Mar 2021
12.	Y.Divya vani	Data Science for Engineers	NPTEL	8 Weeks	Jan-Mar 2021
13.	Dr G.Loshma	Big Data Foundation Course	NASSCOM	23 hours	14-06-2021
14.	Dr K.Shirin Bahanu	Fundamentals of Data Analytics	NASSCOM	23 hours	08-06-2021
15.	Dr K.Shirin Bahanu	Fundamentals of Data Analytics	NASSCOM	23 hours	08-06-2021
16.	Dr K.Shirin Bahanu	Machine Learning – Linear Regression	NASSCOM	23 hours	06-06-2021
17.	Dr K.Shirin Bahanu	Machine Learning – Linear Regression	NASSCOM	23 hours	06-06-2021
18.	Dr G.Loshma	Fundamentals of Data Analytics	NASSCOM	23 hours	05-06-2021
19.	Dr G.Loshma	Fundamentals of Data Analytics	NASSCOM	23 hours	05-06-2021
20.	Dr D.Jaya Kumari	Foundations of Artificial Intelligence	NASSCOM	45 Hours	04-06-2021
21.	M.Nagesawararao	Foundations of Artificial Intelligence	NASSCOM	45 Hours	01-06-2021
22.	Balaji Lanka	AWS for Beginners	Great Learning	2 Hours	May 2021

23.	Dr G.Loshma	"Machine Learning - Linear Regression"	NASSCOM	23 hours	31-05-2021
24.	Balaji Lanka	Python (Basic)	HackerRank	2 Hours	29-05-2021
25.	Dr.K.Shirin Bhanu	Version Control with Git	Coursera	4 Weeks	21-05-2021
26.	Dr.K.Shirin Bhanu	Data Science Foundation	Great Learning	2 hours	May 2021
27.	Dr D.Jaya Kumari	Introduction to Cyber Security	NASSCOM	45 hours	14-05-2021
28.	Dr G.Loshma	Most users to take an online computer programming lesson in 24 hours.	GUVI	24 hours	24-04-2021
29.	Balaji Lanka	Block Chain Basics	Great Learning	2 hours	April 2021

2) Papers Published/ Presented In Conferences:

a) Journal Publications: 05

S .No.	Name of the Staff	Title of the Publication	Publication Details	INDEXING SCI/SCOPUS/ OTHERS	Impact Factor
1	Dr. V. S Naresh	A provably secure sharding based blockchain smart contract centric hierarchical group key agreement for large wireless ad-hoc networks	ConcurrencyComputatPractExper. 2021;e6553. wileyonlinelibrary.com/journal/cpe © 2021 John Wiley Sons,Ltd. https://doi.org/10.1002/cpe.6553 , August 2021	SCI	1.536
2	Dr. V. S Naresh	Lightweight secure communication system based on Message Queuing Transport Telemetry protocol for e-healthcare environments	Int J Commun Syst. 2021;e4842. wileyonlinelibrary.com/journal/dac © 2021 John Wiley & Sons Ltd. 1 of 14 https://doi.org/10.1002/dac.4842 , April 2021	SCI	1.319

3	Dr. D.Jaya Kumari	Deep Neural Network Associate Efficient Elephant Herding Optimization for Diagnosing Angiographic Disease Condition	Turkish Journal of Computer and Mathematics Education Vol.12 No. 7 (2021), 1234-1245, April 2021	SCOPUS	0.32
4	Dr.V. S Naresh	Provable secure dynamic lightweight group communication in VANETs	Trans Emerging Tel Tech. 2021;e4273.wileyonlinelibrary.com/journal https://doi.org/10.1002/ett.4273 , March 2021	SCI	1.594
5	Mr. S Kumar Reddy Mallidi	Bat Optimization algorithm for wrapper-based feature Selection and performance improvement of android malware detection	The Institute of Engineering and Technology, WILEY, DOI:10.1049/ntw2.12022, March 2021	SCOPUS	4.1

b) Conference Proceedings: 01

S.No.	Name of the Faculty	Title of the Conference Paper	Type of Conference	Location	No. Of Days	From Date	To Date
1	Mrs. Anjani Suputri Devi D Ms.D Sasi Rekha	Facial emotion recognition using Hybrid approach for DCT and DBACNN	Springer 2 nd - International Conference on Computer Vision, High Performance Computing, Smart Devices and Networks (CHSN-2021 J)	JNTUK, Kakinada	02	20-08-2021	21-08-2021

C) Patents: 03

S.No.	Name of the faculty	Title of Invention	Application Number	Filing/ Publish/ Granted	Date
-------	---------------------	--------------------	--------------------	--------------------------	------

1	Dr. G Loshma	A Method For Information On Arrival Time Of Buses At Bus Stop	202141013781 A	Published	02/04/2021
2	Dr. O Sri Nagesh	A Coin Recognition System For Blind People	202141012130A	Published	02/04/2021
3	Dr. G Loshma	Interactive multimedia performance assessment system	20214100808A	Published	05/03/2021

4) Student Achievements:

a) Certification Details (UDEMY, COURSEARA, E-Boxetc.)

COURSEARA CERTIFICATIONS

S.No	Roll Number	Name of the Student	Name of the Course	Month-Date
1.	19A81A0517	G Siva Premchand Reddy	Introduction to HTML5	22.06.2021
2.	20A85A0516	N Shanmukha Rama	Data Structures	06.06.2021
3.	19A81A05P5	Chimmana Khyathi Sri	Introduction to Cloud Identity	24.05.2021
4.	19A81A05P5	Chimmana Khyathi Sri	Getting Started with AWS Machine Learning	21.05.2021
5.	19A81A05P4	Solasa Sriya	Object oriented Programming In JAVA	15.05.2021
6.	19A81A0623	Lakshmi Iswarya Gunupudi	Programming Foundations with java script, HTML and CSS	15.05.2021
7.	19A81A0517	G Siva Premchand Reddy	Machine Learning For All	08.05.2021

8.	19A81A05P5	Chimmana Khyathi Sri	Programming Foundations with JavaScripts , HTML ans.CSS	03.05.2021
9.	19A81A0554	Sri Vangipuram Mahathi	Create a website Using wordpress- free hosting and sub domain	26.04.2021
10.	19A81A0554	Sri Vangipuram Mahathi	Build Training Website using Google sites	04.04.2021

TCSion CERTIFICATIONS

S.No.	Roll Number	Name of the Student	Name of the Course	Month-Date
1.	17A81A0572	J Prameela	TCSion Career edge Young Professional	29.06.2021
2.	18A81A05N3	Uppalapati Ganya	Career Edge – Knockdown the Lockdown	04.06.2020

GUVI CERTIFICATIONS

S.No.	Roll Number	Name of the Student	Name of the Course	Month-Date
1.	17A81A05A7	Sunkavalli Tejaswini	Python	07.06.2020
2.	18A81A05J6	Indugapalli Lakshmi Prasanna	Step into Robotic Automation	04.06.2020

CISCO CERTIFICATIONS

S.No.	Roll Number	Name of the Student	Name of the Course	Month-Date
1.	19A81A0554	Sri Vangipuram Mahathi	Introduction to Cyber Security	23.05.2021
2.	19A81A05M7	N Tanmayee	CyberSecurity Essentials	16.05.2021
3.	19A81A05M7	N Tanmayee	Introduction to IoT	15.05.2021

UDEMY CERTIFICATIONS

S.No.	Roll Number	Name of the Student	Name of the Course	No. of Hours	Month-Date
1.	19A81A0534	M Venkata Harsha Vardhan	Java Scripts – Basicsto Advanced	10hrs	13.07.2021
2.	18A81A0505	Shriya Singh Thakur	Leran Python Programming Master Class	63hrs	01.07.2021
3.	19A81A0528	Kuna Kiran Maruthi	The Java Certification course	40mins	09.06.2021
4.	19A81A0517	G.S.Premchand Reddy	HTML & CSS- Certification Course for Beginners	4hrs	07.06.2021
5.	17A81A05J4	T. Amruta Gayatri	Python for Beginners-Learn all the basics of python	5hrs	14.05.2021
6.	19A81A05P5	Chimmana Khyathi Sri	Complete HTML5 Course: From Beginning to Expert	5hrs	09.05.2021
7.	19A81A05P4	SOLASA SRIYA	Python for Beginners-Learn all the basics of python	5hrs	02.05.2021
8.	19A81A0534	Venkata Harsha Vardan Matha	CSS-Basics to advanced for front end developoer	5hrs	29.04.2021

WORKSHOPS

S.No.	Roll Number	Name of the Student	Name of the Course		Month-Date
1.	19A85A0515	M. Rajendra Kumar	Workshop on Flutter	3days	16.06.2021- 18.06.2021

CERTIFICATIONS

S.No	Regd.No.	NAME OF THE STUDENT	NAME OF THE COURSE	Institution	Month-Date
1.	18A81A0505	Bondili Shriya singh Thakur	Problem solving	HackerRank	Jul-2021
2.	19A81A0534	M Venkata Harsha Vardhan	Ethical Hacking	Unschool	JUN-2021
3.	19A81A05G3	Maram Devi Mounika	Front-end Fundamentals	Skill LYNC	JUN-2021
4.	19A81A05B1	Sreeja Santhosha	Artificial Intelligence Foundatons	SkillUp	May-2021
5.	19A81A0650	Pilla Jahnvi Sri naidu	Bootcamp on python and Data visualisation	ASC	April-2021
6.	19A81A0565	Addada Harish	Bootcamp on python and Data visualisation	ASC	April-2021
7.	19A81A05G3	Maram Devi Mounika	Bootcamp with ShapeAI	ShapeAI	March-2021
8.	19A81A0606	Abbireddy Yuktha Navya Sri	Bootcamp with ShapeAI	ShapeAI	March-2021
9.	19A81A0565	Addada Harish	Bootcamp with ShapeAI	ShapeAI	March-2021
10.	19A81A0630	Komperla Sai Aparna	Bootcamp with ShapeAI	ShapeAI	March-2021
11.	19A81A0628	Kodavati Chomudurga	Bootcamp with ShapeAI	ShapeAI	March-2021

12.	19A81A0622	Gudimetia Suvarna	Bootcamp with ShapeAI	ShapeAI	March-2021
13.	18A81A0517	Divya Gudala	Data Engineering Foundation	SIST	08.03.2021- 13.03.2021

APSSDC CERTIFICATIONS

S.No	Regd.No.	NAME OF THE STUDENT	NAME OF THE COURSE	DURATION
1.	19A81A0517	G siva premchand Reddy	Python Programming	22.06.2021- 04.07.2021
2.	19A81A0597	K Nitin Vamsi	Basics of Python	05.06.2021- 25.06.2021
3.	19A81A0517	G siva premchand Reddy	Source code Management using Git And Github	04.06.2021- 05.06.2021
4.	19A81A0528	K Kiran Maruthi	Source code Management using Git And Github	04.06.2021- 05.06.2021
5.	19A81A0528	K Kiran Maruthi	Web designing using react Js	17.05.2021- 05.06.2021
6.	19A81A0517	G siva premchand Reddy	Web designing using react Js	17.05.2021- 05.06.2021
7.	19A81A0594	K Gurudatta Bharth Santosh	Android Application development	17.05.2021- 05.06.2021
8.	19A81A0528	Kiran Maruthi Kuna	Virtual Training Program On Angular	05.04.2021- 30.04.2021

PROJECT BASED ONLINE CERTIFICATIONS

S.No	Regd.No.	NAME OF THE STUDENT	NAME OF THE COURSE	Institution	DURATION
1.	19A81A0650	Pilla Jahnvi Sri naidu	Build a face recognition using python	Guvi	April-2021
2.	19A81A0554	Sri Vangipuram Mahathi	BlockChain Basics	Great Learning	April-2021
3.	19A81A0528	Kiran Maruthi kuna	Full stack development foundation	APPONIX	19.03.2021
4.	19A81A0554	Sri Vangipuram Mahathi	Full stack development foundation	APPONIX	19.03.2021

(b) Internships: 72

S.No.	Student Name	Roll Number	Title	Name of the Industry	Duration
1	Polamalu Kanyaka Alekya	17A81A0594	Software Development (Java)	Wiley Mthree Internship Program	26-07-2021 to 30-09-2021
2	Korlepara J G Sri Vaishnavi	17A81A0505	Trainee Software Engineer	Prolifics Corporation Private Limited.	15-06-2021 to 14-08-2021
3	Swathi Narayana Godavari	18A81A0591	App Development	DC Ikigai Private Limited	20-06-2021 to 19-08-2021
4	Uttej Kumar Bomma	17A81A05F6	Data Analyst	Gnana Analytics Private Limited	01-06-2021 to 30.09.2021
5	Gurram Surya Venkata Sai Sampath	18A85A0502	"IT Support Specialist	SKY GOAL INNOVA TECHNOLOGIES PVT.LED	01-06-2021- to 31.07.2021
6	Vishnumolakala Badarinadh	17A81A05L5			
7	Dodda Satish	17A81A05C6	Associate Software Engineer – Trainee	Acheron	19.04.2021 to

					31.08.2021

(c) Training Programmes conducted for students: 06

S.No	Training Name	Duration		Year	Semester
		From	To		
1	L&T Technologies Company Specific Program	15-09-2021	20-09-2021	III	II
2	TCS National Qualifier Test	02-09-2021	11-09-2021	III	II
3	Company specific training by DXC Technologies	19-7-2021	27-7-2021	III	II
4	Company specific training by Logic works for Accenture	04-6-2021	07-06-2021	IV	II

5	Assessment test	04-6-2021	07-06-2021	III	II
6	Company specific training by Logic works for Accenture	30-04-21	03-05-2021	III	II

(d) Placements:

We are very happy to inform you that the following students are selected in different MNC'S with highest packages:

1. Ms. Y.S.G Swetha Sri Bhavani (17A81A05G7) selected in SERVICENOW HYD WITH PACKAGE OF RS 25.22 LAKHS PER ANUM.

She also got selected in

- TCS - 3.6 LPA
- INFOSYS – 3.6 LPA
- ACCENTURE -4LPA
- DXC - 3.6 LPA

2. Ms. N. VENKATA SRI LALITHA (17A81A0530) selected in big MNC VMWARE WITH PACKAGE OF RS 20 LAKHS PER ANUM.

- HEXAWARE - 3.5 LPA
- INFOSYS – 3.6 LPA

3. Ms. Kavyanjana Vankayala (17A81A0549) also selected in big MNC VMWARE WITH PACKAGE OF RS 19.5 LAKHS PER ANUM.

She also got selected in

- DXC - 3.6 LPA
- WIPRO – 3.5 LPA

THE BLACK HOLE

Black Holes are one of the strangest things in existence. A black hole is a place in space where gravity pulls so much that even light can not get out. Because no light can get out, people can't see black holes. They are invisible. Space telescopes with special tools can help find black holes. The special tools can see how stars that are very close to black holes act differently than other stars.

HOW DO BLACK HOLES FORM?

Most black holes form from the remnants of a large star that dies in a supernova explosion. Primordial black holes are thought to have formed in the early universe, soon after the big bang. Stellar black holes form when the center of a very massive star collapses in upon itself. This collapse also causes a supernova, or an exploding star, that blasts part of the star into space. Scientists think the smallest black holes formed when the universe began and the massive ones where formed when a chain reaction of collisions of stars in compact star clusters. The smallest black hole is as tiny as an atom but have the mass of a large mountain.

CATEGORIES OF BLACK HOLES...

There are four types of black holes: stellar, intermediate, supermassive, and miniature. The most commonly known way a black hole forms is by stellar death. As stars reach the ends of their lives, most will inflate, lose mass, and then cool to form white dwarfs. But the largest of these fiery bodies, those at least 10 to 20 times as massive as our own sun, are destined to become either super-dense neutron stars or so-called stellar-mass black holes.

SAGITTARIUS A*

Sagittarius A* is a supermassive black hole which is at the center of the Milky Way galaxy, 26,000 light-years from the Solar System. The space mass of this massive black hole is about 4.1 million.

Currently the largest known black hole, powering the quasar

TON 618, has a mass of 66 billion solar masses. Massive black holes in the centres of galaxies release so much energy that they play an important role in how the galaxy around them evolves. As well as being impressive objects in their own right, black holes provide unique laboratories for testing strong gravity and matter under extreme conditions. The supermassive black holes play an important role in the life of galaxies.

DINO AT UNO

Recently a news popped up about a dinosaur speaking at UNO. Doesn't it amaze us!
Come let's have a tour of what actually happened!

Why all of a sudden Dino appeared at a meeting like that?

Why all of a sudden Dino appeared at a meeting like that?

Frankie the Dino was actually a character created by the UNO as a part of the "Don't choose extinction" campaign. As a part of the campaign a short film was being picturized and this scene was from that short film. Though it was a CGI (Computer-Generated Imagery) this speech really carried a message. It questions about human intervention in climate change.

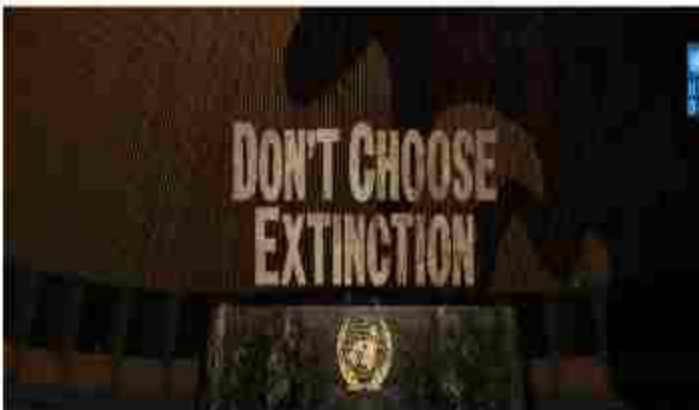

Why Dinosaur?

Whenever we hear the word "extinction" the first thing that comes to mind for most of us is "Dinosaur". It is said that Dinosaurs went extinct about 70 million years ago. However, re-searches are still going on for the proof of their existence and extinction. Archeologists at different places found the fossils which told to be of these creatures and were exhibited till today at various museums.

What is the speech about?

The speech by Frankie goes like this "At least we had an asteroid", (the carnivorous critter warns, referring to the popular theory explaining dinosaurs' extinction 70 million years ago.) What's your excuse? It's time humans stopped making excuses and started making changes (to address the climate crisis.). UNDP research released as part of the campaign shows that the world spends \$423 billion annually just to subsidize fossil fuels, enough to cover a COVID-19 vaccination for every person in the world or **three times the annual amount needed to eradicate global extreme poverty.**

PHOTOSYNTHESIS

Photosynthesis is the process by which plants, some bacteria and some protistans use the energy from sunlight to produce glucose from carbon dioxide and water. During these process oxygen is also formed along with carbohydrates.

Photosynthesis may be summarised by the word equation:

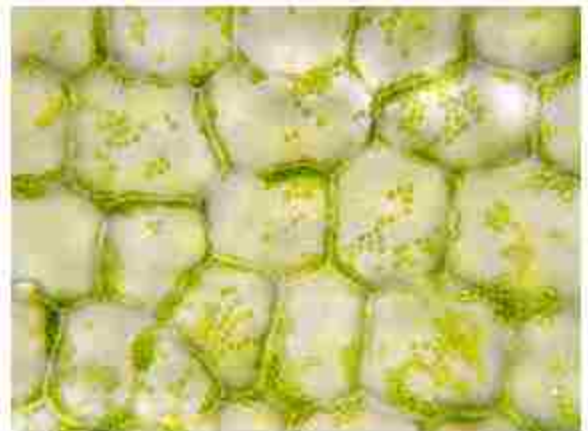

The conversion of usable sunlight energy into chemical energy is associated with the action of the green pigment chlorophyll.

CHLOROPHYLL:

chlorophyll is a complex molecule. several modifications of chlorophyll occur among plants and other

photosynthetic organisms. All photosynthetic organisms have chlorophyll a. chlorophyll a absorbs its energy from the violet-blue and reddish-orange wavelengths, and little from the intermediate (green-yellow-orange) wavelengths

All chlorophylls have:

- a lipid-soluble hydrocarbon tail ($C_{20}H_{39}$ -)
- a flat hydrophilic head with a magnesium ion at its centre; different chlorophylls have different side-groups on the head

The tail and head are linked by an ester bond

Stages of photosynthesis:

Photosynthesis is a two stage process:

The light dependent reactions, a light-dependent series of reactions which occur in the grana, and require the direct energy of light to make energy carrier molecules that are used in the second process

The light-independent reactions, a light-independent series of reactions which occur in the stroma of the chloroplasts, when the products of the light reaction, ATP and NADPH, are used to make carbohydrates from carbon dioxide (reduction); initially glyceraldehyde 3-phosphate (a 3-carbon atom molecule) is formed.

ADVANTAGES:

- * photosynthesis converts inorganic materia into food that provides our ecosystem with energy.
- * Green plants provide organic food to all the animals and humans
- * Photosynthesis helps in providing oxygen in the atmosphere required by all the organisms

Damaged souls still have worth.

"A shop owner placed a sign above his door that said: 'Puppies For Sale.'

Signs like this always have a way of attracting young children, and to no surprise, a boy saw the sign and approached the owner; 'How much are you going to sell the puppies for?' he asked.

The store owner replied, 'Anywhere from \$30 to \$50.' The little boy pulled out some change from his pocket. 'I have \$2.37,' he said. 'Can I please look at them?'

The shop owner smiled and whistled. Out of the kennel came Lady, who ran down the aisle of his shop followed by five teeny, tiny balls of fur. One puppy was lagging considerably behind. Immediately the little boy singled out the lagging, limping puppy and said, 'What's wrong with that little dog?'

The shop owner explained that the veterinarian had examined

the little puppy and had discovered it didn't have a hip socket. It would always limp. It would always be lame.

The little boy became excited. 'That is the puppy that I want to buy.'

The shop owner said, 'No, you don't want to buy that little dog. If you really want him, I'll just give him to you.'

The little boy got quite upset. He looked straight into the store owner's eyes, pointing his finger, and said;

'I don't want you to give him to me. That little dog is worth every bit as much as all the other dogs and I'll pay full price. In fact, I'll give you \$2.37 now, and 50 cents a month until I have him paid for.'

The shop owner countered, 'You really don't want to buy this little dog. He is never going to be able to run and jump and play with you like the other puppies.'

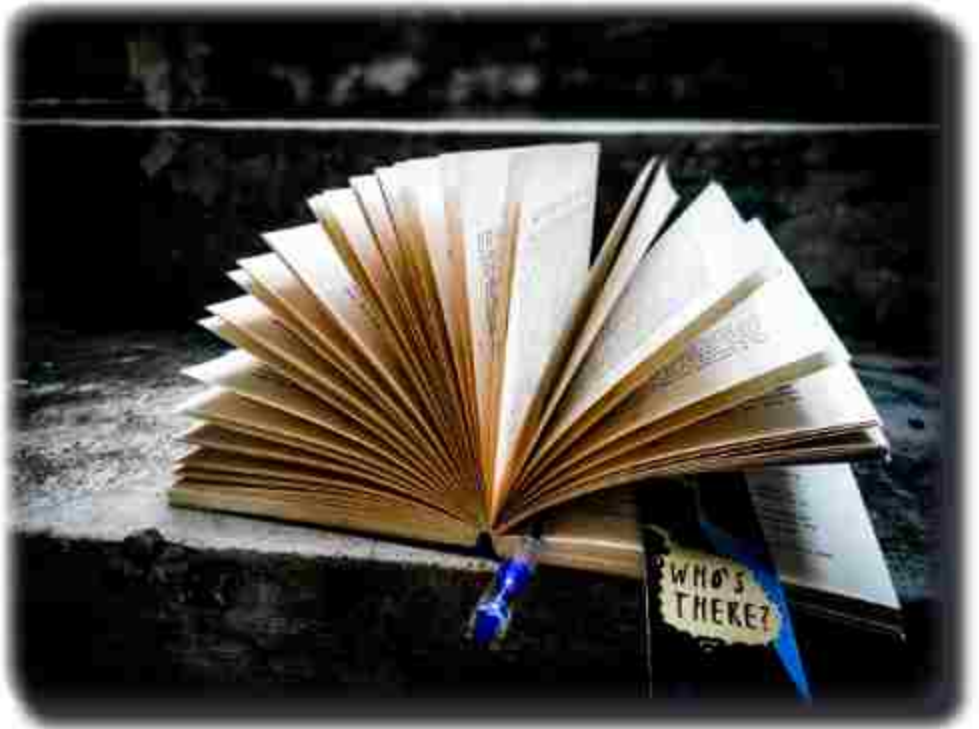

To his surprise, the little boy reached down and rolled up his pant leg to reveal a badly twisted, crippled left leg supported by a big metal brace. He looked up at the shop owner and softly replied, 'Well, I don't run so well myself, and the little puppy will need someone who understands!'"

... No matter how damaged; but we all are worthy for someone, who understands us. Be more understanding and Kind towards other ...
